It will interest a good many to read of some of the news that appeared in the Concord Times in the year of 1895. By these few articles you can see a good many changes since 1895. Here is an article that has changed in the past thirty years:

"W. J. Montgomery and J. Lee Crowell, attorneys and counsellors at law, Concord, N. C., as partners, will practice law in Cabarrus, Stanly and adjoining counties in the superior and supreme courts of the state and the federal courts. Offices on Depot street."

The Times was only published on Thursday in 1895. Now it is published on Monday and Thursday. We should be very proud of The Times for look how it has grown in the last thirty years. The Times also had a few correspondents in 1895, one for the Forest Hill section and other small places in Cabarrus county.

The Jackson Training School lost their second straight game Saturday when the Harrisburg nine snowed them under a 14 to 2 score. AGRICULTURAL COLUMN. The A. and M. College of Mississippi reports as the result of experiments made to control the fruit worm, which often proves to be a serious pest on tomatoes, and always prevails to a certain extent on early plantings, that the use of arsenate proved to be helpful.

If early blight is serious spraying with bordeaux mixture (4-4-50) plus a pound of powdered lead arsenate will give the best results, though dusting with calcium arsenate is easier and practically as effective when no fungicide is needed, using one-half of powdered lead arsenate and one-half powdered lime. Application should be made as soon as the first injury is noticed and continued at intervals of a week or ten days. To prevent any possible chance of poisoning from eating the tomatoes the poison application should be discontinued about two weeks before picking begins.

The dusting or spraying advocated will also control the big green horn worm and tend to keep in check the hoards of blister beetles that sometimes attack tomatoes. In spraying or dusting be sure to reach all surfaces of the stalk and leaves.
