The reader must beide for himself how and he will believe of the following account of a "Marveilous discovery," related in the Cook Reporter: We have been informed, but w'nt exact amount of cre libility we should give to the statement we are not record to say, that in the progress of the form gion of the I vies Bulway, I some inhoners discovered, he a short distane beneath the surface of the earth with in about two miles of Ask aton, a g'gantic skeleton 11 feet in length. 13- lde the remails was found a vessel, with an in-cittion on it, and cating that some hing would be found by digging deeper. Following this in imation they uncovered another vessel, something resembling a bottle in hape, inscribed with a legend which directed that three drops of the contents should be poured into the mouth of the ske'eton, whereupon its owner would come to life again. Althourn much doubling, Mow much for force ow much for fame. They followed the instructions; but on leting the second drop into the mouth, the skeleton began to stir,upon which the men Lecame so frightened that they took to flight, expecting, as they can, to be pursued by the half resuscitated giant. The report o'this strange s'ory caused such a sensation in the ne-guborhood the police had to e' - up the grave, and thus the old Fenian glant was been once more consigned to his long slun ber of many ages.
