SOAP AND WATER.

not the author of the saying given above. Very well, it will do for a text the oils abstracted from the skin." No of Philosophy. We are glad to learn that he will soon be home in this place.

Of the extent of his indebtedness we are tablished fact, the use of soap is a pos- fats should be used to greater extent itive essential. The Augusta Chronicle than is now done for toilet purposes. is responsible for the statement that the Bulgarians are never bathed but twice er, however, is not healthful. You

of resistance to external pritants.

ritating than hard water."

that are so much sought after. He lowing extract.

Trillet spap is a chemical compound of vegetable or fatty substances with soda or potash, used, on account of its properties of loosening and dissolving greasy matters, as a cleansing article for the toilet. It is not uncommon for manufacturers of toilet soap to recommend their ware for rendering the hands fair white, and for imparting a bright clear complexion, conditions which we should be loth to ascribe solely to the use of any soap. The presence of persumes in soap is not of itself objectionable, were it not that they are often introduced to disguise the odor of the Toilet soap is a chemical compound ers. ocuous perfume. Indeed Service, etc. A great many men came to the con clusion that if they were too old at forty-both as a saponifying substance and perfume. The hard sods scaps are preferable to the soft potash soap for toilet to old to vote; and many more compared to the contract.

A great many men came to the con clusion that if they were too old at forty-both as a saponifying substance and five years to hold an office under a Democratic administration, they were concerned has advertised for proposals to reach the soft potash soap for toilet to old to vote; and many men came to the contract.

Friday. The fire was caused by a decetive flue. The loss we judge to be about \$6,000. The President of the road has advertised for proposals to reach the soft potash soap for toilet.

emed of toilet soaps. The color of aps is produced by mixing mineral baints, as vermillion (pink), altramarine (blue), ochre (brown), etc Good soaps must not contain free alkali any foreign irritating substance. Such simple powders as ground starch, magnesia, etc. are harmless, and may be used as a protection against external pritants. Excessive application of cologue, or any toil- Conferet washes made of alcohol, abstracts the moisti re from the skin and render it dry Some weeks since we clipped a leadThe same remark applies to the too fregeditorial from the Wilmington Star
