

**BRIM ROUTE 1.**

Brim Route 1, April 1.  
Mr. Editor:  
We think our people are on the up grade generally at Asbury. Dr. Leak has just finished up one of the best dwellings in our county if not the best. It stands on a knoll near the old P. E. Slate site, and can be seen for a distance. He is now leveling up his yard and sowing grass and planting shade trees about his house.

We have had the best school here that has been taught here for years. Rev. Mr. Stone taught out half the school and made us a good teacher. He got sick and had to give up his school. We then, by the help of the committee, got Miss Mary Swanson, of Pilot Mt., to finish the school, and she also made us a good teacher. She averaged 40 scholars the last month, larger than ever before so late in work time. It was generally decided that the children advanced faster under her teaching than ever before at Asbury. The school closed Friday.

Mr. Thompson Rodgers, the fine tobacco raiser, has just bought a splendid organ and two-horse buggy, which adds to his home beauty and pleasure.

Mr. Robt. Ward has put up a shop at the W. L. Smith's old stand, and is doing a splendid business from the way his anvil rings and from the amount of cash he handles. He does splendid wood work of any kind.

Our people have organized a Sunday School at the new Presbyterian church here, and are having a large attendance. There were more than fifty in the school Sunday. We use union literature and all denominations are attending the school and are working harmoniously together.

Our people have sown more grass seed than usual, and are well up with all farm work.

But Mr. Editor one big mistake our people are aiming to make one

of the biggest tobacco crops in this neighborhood that has been planted if the season is good. A great effort is now being made to get in all the ground and get it in good shape for a large crop of tobacco. Thompson Rodgers has already bought 100 sacks of fertilizer. I heard that G. L. Simmons asked his people that live with him the other day to find out what amount of fertilizer they wanted, they put down 116 sacks to count 12 sacks for himself. Where will the two farmers that use 216 bags of fertilizer costing \$500.00 and other expenses according to their profit next year out of 6 or 7 cents a pound for their tobacco. Stop and count, farmer.

**Chew What You Know About and Know What You Are Chewing**

There is real pleasure in chewing the best tobacco grown—where the best tobacco grows—in the famous Piedmont Country.

Only choice selections of this well-matured and thoroughly cured tobacco is used in making SCHNAPPS. That's why SCHNAPPS and others of the Reynold's brands, as shown by the Internal Revenue statistics for a fiscal year, made the wonderful growth of six and one-quarter million pounds, or a net gain of one-third of the entire increased consumption of chewing and smoking tobaccos in the United States.

Evidently, chewers cannot resist the flavor and they cheer SCHNAPPS because SCHNAPPS cheers them more than any other chewing tobacco, and every man that chews SCHNAPPS passes the good thing along—one chewer makes other chewers—until the fact is now established that there are many more

chewers and pounds of tobacco chewed, to the population, in those States where SCHNAPPS tobacco was first sold than there are in the States where SCHNAPPS has not yet been offered to the trade.

SCHNAPPS is like a cup of fine Java coffee, sweetened just enough to bring out its natural, stimulating qualities. SCHNAPPS pleases all classes of chewers: the rich, because they do not find a chew that really pleases them better at any price; the poor, because it is more economical than the large 10c. or 15c. plugs and they get their money's worth of the real snappy, stimulating flavor so appreciated by tobacco lovers. All imitations contain much more sweetening than SCHNAPPS. They are made that way to hide poor tobacco improperly cured.

For the man who chews tobacco for tobacco's sake, there is no chew like SCHNAPPS.

Sold at 50c. per pound in 5c. Cuts. Strictly 10c. and 15c. Plugs
