Total majority against prohibition in the county 435.

The above is the vote cast in the precincts of Stokes County yesterday.

The election was hot and bitter in some sections, and some of the "antis" were furious.

The figures showed that in proportion to the number of votes cast, Danbury is the banner wet precinct of the County, and King the banner dry precinct.

The result in the County was a surprise to the prohibitionists in that the voting was heavier than was expected. The prohibitionists polled more votes than they had counted on, while a great many more of the wets voted than drys had expected.
