Walnut Cove.

Walnut Cove, Nov. 1.—People are about done sowing wheat in this community.

I guess Miss Mollie Gibson is looking very sad this week as her best fellow has gone to Charlotte to enlist in the U. S. army. He passed here Sunday on his way. We were sorry to see Roy leave.

A READER.

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Dr. W. H. Waketield, of Charlotte, will be in Rural Hall, at the hotel, on Wednesday, Nov. 10th, for one day only. His practice is limited to the medical and surgical treatment of diseases of the eye, ear, nose and throat and fitting glasses.

Mr. W. W. King left today for Winston on professional business.

BRIDGE COMPLETED AT WALNUT COVE

OVER DAN AT PINE HALL BRIDGE NEARLY COMPLETED

County Commissioners to Examine Structure and Pay For Same If Accepted at Special Meeting Next Tuesday.

The county commissioners were in session at the court house here Monday, but little business of general interest being transacted. A small crowd was in attendance, attracted mostly by the public sales of land.

The representative of the bridge company appeared before the board stating that the new bridge for Pine Hall had been completed, presenting their bill for the same, \$5,200. The commissioners will examine the bridge this week and provided it measures up to the contract requirements, will be paid for at a special meeting of the Board here next Tuesday.

Removal of the Capital.

Regarding the renewed discussion in the new papers of the joke about moving the State capital from Raleigh. The Spencer Crescent says:

The Lexington Dispatch rises to remark that "if Greensboro is in earnest and proves strong enough in the next Legislature to get an election ordered, we are free to confess that we don't know whether Raleigh would come out victorious or not." Of course this talk is about moving the capital. The Dispatch says also: "Some figures published the other day place the vote of the west at 138,000, and of the east at 114,000." If you'll draw a line half way between Greensboro and Raleigh, it crosses a part of the State, and take the census of 1900 you'll find just 65,000 more people west of that line than east of it, and since 1900 it has increased in favor of the west. Greensboro's the place for the capital, the center of area and the center of population. It's where the capital is going to be, sooner or later.

Rather later than sooner, we would say. The Crescent seems to take the matter more seriously than any other paper which has alluded to the subject. By the way do those who are having something to say about the removal of the capital know it is said that should the seat of government be moved from Raleigh Capital square and some other real estate in that city would revert to the heirs of Mr. Lane, the man who conveyed the same to the State when Raleigh was chosen as the capital site? We have heard—whether true or not we cannot say—that the deed of conveyance contains a conditional clause to that effect. Mr. Lane's heirs are few in number and all live in Raleigh. They are not basing any great hopes, however, of ever owning Capitol square through the removal of the capital site to some other city.—Charlotte Observer.

Off For the Fair.

Mr. and Mrs. J. S. Taylor, Mr. and Mrs. W. C. Slate, Prof. J. T. Smith and Sheriff C. M. Jones left early today for King to attend the Fair.

Farmers Can Cross On New Structure This Week—Work Begins On New Episcopal Church—Other News.

Walnut Cove, Nov. 1.—Mr. Luther Mitchell has moved to town in his cottage he bought from Mr. Jacob Fulton.

Born to Mr. and Mrs. David Solomon, a fine son.

Mr. Mott hired a horse from Messrs. Davis & Whitten yesterday and went out driving. The horse took fright and ran away, breaking the shafts and overturning the buggy and throwing Mr. Parham out and finally got entirely free from the buggy and came into town. No one was hurt.

Mr. Joe Cofer's baby died Saturday night.

Talk about prohibition doing no good. The farmers all come back from Winston sober. We have hardly seen anyone even drinking this fall. Such a change. Anybody can see it unless they shut their eyes to the truth.

The bridge contractor says he will have the bridge here so wagons can pass over this week.

Carpenters will commence work on the Episcopal church today. The old church lot was sold Saturday. Mr. J. B. Woodruff was the purchaser.

Protracted services began at Salem Chapel last Sunday. Mr. Williams, a former pastor of the Episcopal church, held services there Sunday night.

The new bridge here is a fine structure, and we feel very proud of it.

Job's Comforters.

When you see a friend looking ill, don't forget to tell him so. It comforts him greatly, and conduces to his early recovery. Stretch your eyes as wide as two barn doors, and observe in tremendous surprise: "What in the world's the matter? Have you been sick?" On receiving an affirmative reply, say: "Well, you certainly do look it." This displays on your part the finest tact, and renders your presence extremely felicitous.

Moral: You ought to shake hands with your self that you have been allowed to run loose so long. Society has incurred a distinct loss in that you have not been a doctor, so that by killing so many of your patients you might not long ago by the hemp route have been expunged to that region where the whangdoodle never ceases to whangdoodle.

Dark Days Coming.

Be prepared for the day of adversity, sickness or old age when you will no longer be able to work, and if you have not saved your earnings you must become an object of the charity of your friends, relatives or the public.

A small amount placed in the Bank of Stokes County at Danbury or Walnut Cove, and constantly added to, will grow fast. The interest which the Bank will pay you will be working for you all the time, too, and in a few years you will be independent.

Start a savings account today. The Bank will receive any amount, large or small, and will pay you four per cent interest, compounded every 3 months.

Sheriff C. M. Jones will be in attendance at the Stokes County Fair this week and will have the tax books with him, so if you want to pay up it will be a good opportunity.

Mr. Lester Morefield and sister, Miss Jettie, were among those who visited at Mr. John Morefield's Sunday.

The North View school will begin today. Everybody seems to be proud of their teacher, Mrs. Arthur Moore.

A New Medical Conception of Disease.

Current Literature.

Few indeed are the men and women of full age—say 25—who have not yet contracted the malady that will kill them, according to that distinguished scientist and physician Dr. Felix Regnault. Normally, as contemporary investigators are beginning to find out, it takes twenty years for a fatal malady to kill a patient. The popular impression is that a man may die suddenly or that he may only require a year to die in or six months. To be sure, a man may be killed or a child may die in a few months at the age of one year. But, ordinarily speaking, all deaths are very slow, indeed, and about 95 per cent of civilized adults are now stricken with a fatal disease. They do not know it. They may not suffer from it. In due time they will have their cases diagnosed as cancer, or as tuberculosis or diabetes or what not. But so inveterate are current misconceptions of the nature of death that the origin of the fatal malady in time—will be miscalculated by from ten to thirty years.

In the case of human beings, death—barring accident—is nearly always caused by some specific malady. This malady is as likely as not to be cured—what is called "cured." The "cure," however, no matter how skillful the treatment or how slight the disease, has left a weakness behind it in some particular organ which is, if not prematurely worn out, at least so worn that its resisting powers are greatly diminished. All of us in this way when we have reached a certain age possess an organ that is much older than the rest of the physique. One day we shall die because of this organ. Even if we live to be very old indeed, we shall not die of "old age," but of weakness of the lungs, or of the kidneys or of the liver or of the brain.

All the candidates with their friends will be at the Stokes County Fair at King this week, and a large number of votes will doubtless be secured among the crowd there.
