Need of Farm Engineers and Demonstrators.

Many of our country people have not been shown how to provide certain comforts which could easily and inexpensively be purchased or provided. There are probably thousands of farm homes in Virginia where either the men or the women or the servants have to go quite a distance to the wells or springs to bring pails of water for use in the house when it would be easy to put in rams, or gasolines, or windmills that would pump the water into the house and into the stable. In many instances, all that is needed is to call attention to such waste of time and energy.

It seems to me entirely practicable for the Virginia Polytechnic Institute or the State Board of Agriculture to employ a farm engineer whose business should be to go to any farm in the State, when requested to do so, and show the occupant how to utilize his water supply for house and barns at the least cost; how to plot his farm in the most practicable way; how to drain lands; how to inaugurate the labor-saving devices that spell success, the lack of which spells waste. Would not the increased efficiency and prosperity resulting from this work more than repay the salary and traveling expenses of such a man?—Superintendent J. D. Eggleston, of Virginia.

Mr. Odell Jones, who is attending school at North Wilkesboro, will return home tomorrow to spend Christmas with his parents, Sheriff and Mrs. C. M. Jones.
