

Profit by Competition

When several fertilizer companies decide to extend their business into new sections, price cutting is apt to occur. Farmers are tempted by these reductions to buy even lower grade goods than the average. But the lower the grade, the less plant food one gets for a dollar.

Ask for one per cent. increase of Potash in place of each dollar per ton reduction. Instead of a price cut of three or four dollars you will get 25 or 33 per cent. more plant food for the same money.

Tell your dealer about this right away—the price cutting may come at any time.

We will sell Potash in any amount from 200 lbs. up. Write for prices.

Send for free books containing formulas for profitable fertilizers.

How To Avoid Consumption.

The best defense against consumption is a perfectly healthy body. We are all more or less exposed to the dangers of consumption much of the time. The dust we inhale is often laden with the deadly germs. The disease may also be transmitted by means of fly infected foods and milk and meat from tuberculous cattle. While these possible sources of infection exist and will probably continue to exist largely beyond our control, we can only do the next best thing which is to avoid the disease despite these conditions.

Appointments for Danbury Circuit
