M. T. CHILTON, Clerk Superior Court.

CORTRIGHT METAL SHINGLES

Laid Right Over Wood Shingles
No Dirt, No Bother—In a very short time any building can have its fire-trap covering turned into a modern fire-proof, storm-proof, lightning-proof roof at a very moderate cost—a roof that will last as long as the building and never need repairs.

For Sale by
R. H. R. BLAIR, DANBURY, N. C.

Land Value Almost Doubled

WHEN a Lee county, Illinois, farmer bought a run down 400-acre farm, his neighbors thought he had made a bad bargain. After three years' soil treatment by scientific methods, he raised more than eighty bushels of corn to the acre on land that produced less than thirty bushels the first year he farmed it.

It is no longer unusual for us to get reports from farmers who have been using manure spreaders consistently for periods ranging from three to five years, to the effect that their land is regularly raising so much more produce that the value of the land is almost doubled.

I H C Manure Spreaders

are made in various styles and sizes to meet all conditions. The low machines are not too low to be hauled, loaded, through deep mud or snow. I H C spreaders are made with trussed steel frames in wide, medium and narrow styles; all of guaranteed capacity. There are both return and endless aprons. In short, there is an I H C spreader built to meet your conditions and made to spread manure, straw, lime, or ashes as required.

I H C spreaders will spread manure evenly on the level, going up hill, or down. The wheel rims are wide and equipped with Z-shaped lugs, which provide ample tractive power. The rear axle is located well under the body and carries most of the load. The apron moves on large rollers. The beater drive is positive, but the chain wears only one side. The I H C dealer will show you the most effective machine for your work. You can get catalogues from him, or, if you prefer, write
