

A CHANCE FOR CO-OPERATION

Let Union Members Get a Thrashing Machine in Your Neighborhood.

For years I had been talking and writing about the importance of a winter cover crop of oats, rye, wheat or vetch, and peas, soy beans and other legumes to protect and improve the soil; but I was met with the argument that the average farmer was not able to buy enough seed to amount to much. A few of them would plant peas between their corn rows, and others would sow a few acres of oats; but 90 per cent. of the cleared land was left without a cover crop during the winter. The whole force of the farm was too busy picking cotton to pick enough peas for seed, and they cost too much for the average farmer to buy them, so there were only about one-third as many planted as should have been. I had repeatedly suggested the idea that each local Union should form a stock company and buy a thrashing machine to thresh small grain and peas, vines and all; but did not succeed in impressing the idea on the minds of the farmers until Professor Beattie came along and persuaded a number of them to plant peanuts. As it required a thrashing machine to pick the peanuts, the committee appointed by Stony Point Union to purchase a machine, decided to buy one that would thresh grain and stock peas as well as peanuts.

This machine has been in use only two years, but great good has already been accomplished, and much more is destined to follow. Beside thrashing several carloads of peanuts, this machine has been busy, when the weather was suitable, thrashing peas. More farmers than ever before have sown oats, with a view to saving more seed to sow cover crops next fall.

Other local unions are beginning to sit up and take notice, and it is safe to predict that before many years there will be a thrashing machine in every neighborhood.

Every intelligent farmer knows, or should know, that a cover crop will protect his soil from washing and leaching during winter and early spring, and even those who are not overly intelligent know that peas will improve the soil. The main trouble has been the lack of seed. With a thrashing machine in each neighborhood, this trouble will be over, and our fields will be as green in winter as in summer, more legumes will be planted, better crops will be made, and a brighter day will dawn.—J. M. RAINES, in The Progressive Farmer.

Hail and Wind Damage Crops in Virginia--Frost June 10 and 11.

Novum, Va., June 11. Dear Old Reporter:

I will write you a few items from this section as I had to leave my old home county on account of bad roads, for I could not get my photo cars over the roads in Stokes. But I love to work the photo art in Stokes county, and am hoping that the Stokes people will begin to see that they need roads soon; and enterprises can come into the county and help pay for good roads.

Hello, Stokes folks, we had frost over in the Virginia valleys on June 10th and 11th, but no damage was done. The hail has done some damage in the past 10 days. Crops are looking fine where the wind and hail missed.

Mrs. A. T. Overby and Annie, her daughter, visited Mrs. J. W. Sprinkle last week to see the great dancing beauty.

This is a corn and grain section and sheep and horses are plentiful over here.

A. T. OVERBY.

Easier to Feed Two Horses Than One

Now, brother one-horse farmer, in conclusion, get another horse; double your working capacity; double and treble your earning power. Don't put yourself up against a horse or mule. I started and farmed with one mule, but it was because I had to, and not for long. Nor do I believe any one-horse farmer has to work one horse or mule long. Some will say, "O, I can hardly feed the one I have, much less two." I thought the same, and then I bought feed. Now my corn crib and smoke-house are at home, and I have three horses to feed. Some will say big turn-plows, harrows, mowing machines, rakes and cultivators cost money. Well, they do, but you will, as a two-horse farmer, be able to buy them, because they will pay for themselves by increasing your earning power and improving your soil, which is your standard, as no man gets above his soil.—J. P. Hopkins, in The Progressive Farmer.

Right Here Is Your Chance To Buy That Typewriter!

This is a Straight-from-the-Shoulder Typewriter Talk by a Typewriter Man to the Readers of the Reporter.

No other typewriter built—regardless of any claims made—is the equal of the new Fox Visible Typewriter either in material used, or in workmanship, or in the number and convenience of its special features. There are many good typewriters being built and sold, but we claim for the New Fox Visible Typewriter that it is better than the best of these, and that its automatic features combined cannot be found in any other typewriter. The New Fox is a typewriter that will meet with the approval of the most critical user. A single demonstration will convince you—we will make it at our expense, if you will permit us.

Whether you have had the use of a typewriter or not, you have paid for one many times over! Yes, sir, we mean it; every day you continue using the old, slow method of writing with a pen you are unconsciously paying for a typewriter. The farmer who cuts his grain with a scythe pays with every drop of sweat for a reaper. If you are neglectful of your wearing apparel and expose yourself unnecessarily to the rain and cold you are paying for the very things that would have kept you well and comfortable. Remember this and mark it well: You must Pay—Pay for the necessities of this life, whether you use them or not.

THIS IS THE NEW VISIBLE FOX
"BETTER THAN THE BEST OF ALL OTHERS"
Sent on Free Trial, Express Pd.

Look at the illustration of our New Fox Visible Typewriter, shown above, and compare it with any other typewriter you have ever seen or used. Here is a really VISIBLE typewriter—note that the printing point is on top in plain sight, and that the type bars rise from where they are lying and strike the platen in full view of the operator, and in a direct line of vision, and that all of what you have written remains in full sight until the paper is removed from the typewriter. Compare this with those old style typewriters, that some firms are still advertising as visibles, but on which the printing point is beneath the typebars, and you have to look down into them—or between them—to see what you have written. Touch a key in the keyboard and you change the color of your writing instantly from black, blue, or purple to red. Press the Tabulator Key at the left (in front) for paragraphing, writing the complimentary closing, etc.; also for all kinds of billing. At the right (in front) is our Back Space Key. This moves the carriage backward for making corrections, or putting in punctuation. This key also enables the operator to erase a word of three letters and write one of four in its place. Press the Stencil Key shown at the left (front) for making stencils from which thousands of duplicate letters can be made. Four rows of keys reduce the shifting one-third. The right Shift Key locks automatically for writing in all caps. A positive automatic Line Lock prevents you from writing beyond a predetermined line. The ribbon travels in a "zig-zag" line—not straight across from spool to spool as on others—thus using all of the ribbon and making it last three or four times as long as on other typewriters. The ribbon automatically re-winds itself from one spool to the other without any attention from the operator. Carriages are interchangeable, and run on ball bearing tracks. Platens are removable, so that both a hard and soft platen can be used on the same typewriter. Extremely light touch. "No falling leaf is lighter than the touch of the Fox Typewriter." Choice of Elite, Pica, Condensed Roman, Medium Roman, or Italic Type—we carry more than three thousand special type in stock, of our own manufacture, and can furnish keyboards for any language. The Fox has an easy, almost noiseless action, is very durable, and is sent complete with cleaning outfit and metal cover with hard wood base.

This is the Fox, the typewriter we manufacture—this is the typewriter that we will send to any one anywhere in the United States on Free Trial, all express charges fully paid—no "red tape"—no delay—no obligation to buy. If purchased after trial you can pay a little down—whatever you can spare—and the balance in small monthly payments.

Reader, in all sincerity we can honestly say this proposition has never been equaled by any other typewriter company, and all we ask is that you write us TODAY—NOW—giving us your name and address so we can send you our catalog and write you personally about our typewriter and Free Trial offer.

Finds Cure for Epilepsy After Years of Suffering

"My daughter was afflicted with epileptic fits for three years, the attacks coming every few weeks. We employed several doctors but they did her no good. About a year ago we heard of Dr. Miles' Nervine, and it certainly has proved a blessing to our little girl. She is now apparently cured and is enjoying the best of health. It is over a year since she has had a fit. We cannot speak too highly of Dr. Miles' Nervine."

MRS. FRANK ANDERSON, Comfrey, Minn.

Thousands of children in the United States who are suffering from attacks of epilepsy are a burden and sorrow to their parents, who would give anything to restore health to the sufferers.

Dr. Miles' Nervine is one of the best remedies known for this affliction. It has proven beneficial in thousands of cases and those who have used it have the greatest faith in it. It is not a "cure-all," but a reliable remedy for nervous diseases. You need not hesitate to give it a trial. Sold by all Druggists. If the bottle fails to benefit your money is returned.
