Make the Hay Crop an Essential Part of the Rotation

I prefer a crop rotation something on this order: Corn on grass sod, with potatoes the following year. This leaves the ground in fine condition for wheat without further plowing, provided, it is thoroughly worked over with a disk or cutaway harrow. In March following I sow on the wheat a mixture of about ten pounds of red and alsike clover seed to the acre, to which is added some redtop grass seed and a small quantity of alfalfa seed to get my ground inoculated with the proper bacteria for a crop of alfalfa later on. The alsike clover seed being only half the size of the red clover, one pound of it will go twice of far as a pound of the former. I use a weeder or peg-tooth harrow to cover the seed well.

While timothy does well on the cold and heavy clay soils of the North and West, it does not succeed well on the sandy soils of the South, but redtop, or herdsgrass, tall meadow oats grass, orchard grass, and in many places Kentucky bluegrass, do quite well for pasture where more or less permanency is required. Sweet and Japanese clover also fill in good on this line. Old pastures can be renewed or more less improved by disking in suitable grass seed and some fertilizing.—Samuel Rau, in Progressive Farmer.

Messrs. R. W. Stewart and John Taylor attended the dance at Piedmont Springs Saturday night.

LOOK OUT FOR THE NEW MONEY

Size of present bill—7.2x3.04 inches.

The New and Smaller Paper Currency

It is expected that within a month or two the people of the United States will witness a great revolution in the size and appearance of their paper money. Each one of the two billion notes of that kind now in circulation will be supplemented by uniform pieces of currency about a quarter size smaller than now used.

The change in size is not the only one. Any note with Washington's portrait on it will be one dollar, Jefferson's, two dollars, Lincoln's, five dollars, Grover Cleveland's, ten dollars, Alexander Hamilton's, twenty dollars, and so on. This plan will render the raising of bills by crooks an impossibility, and we will have the safest and simplest system of national currency in the world.

However, the new money will be just as elusive—just as hard to get and keep—as the old currency, and your need for the services of a good bank in caring for it will be just as great. This strong institution stands ready to serve you in this connection.
