HOME WORK FOR AGRICULTURAL STUDENTS

Massachusetts Plan For Combining Practical Experience With Classroom Instruction.

A plan for combining actual work on the home farms of students with classroom instruction in the county agricultural schools has been developed in Massachusetts and is being copied in several other states. Each student is required to outline some project of a farm enterprise which he will carry out on his home farm under the direction and supervision of his instructor. He, himself, however, is responsible for the proper performance of the work and must report upon its progress. The project is considered as much a part of the student's work as attendance in the classroom. This plan bridges the gap between the theoretical and the practical, bringing the instructor into contact with actual farm problems.
