A NEW COURSE IN CORN CLUB WORK

Plans Under Which the New Work Will Be Conducted.

The management of the Boys' Corn Club work has mapped out a new course for club work for the new year which makes the corn club work more attractive in that it gives every boy in the work an equal chance with every other boy in the work. The old plan we have followed for the past few years, awarding prizes for highest yields has been very successful. In a general way showing the possibilities of our soil and at the same time training the boys. But it has had one discouraging feature. The fact that some boys' fathers have much better soil than others made it almost impossible for the boy on the poor soil to make as great a yield as the boy on the better soil, but under the new method every boy will have an equal chance in the work since he will be rewarded on the percentage of increase rather than highest yield. In addition will give the boy a training in the much needed knowledge—that of soil building.

Following is a letter from our State Management of club work setting forth the plans under which work will be conducted, also form of application card:

West Raleigh, Sept. 7, 1915.

By Dear Corn Club Boy:

We have through the club work demonstraed to the world the remarkable corn producing possibilities of Southern soil. However, we are convinced that the greatest good to the greatest number can be accomplished by showing how, by crop rotation and the application of good methods, the farmer with poor soil, (and the average North Carolina soil is poor soil) may increase the productivity of his soil and

at the same time make a profit each year.

Basing our opinion upon results obtained in other lines of club work we believe we can more easily and more effectively demonstrate a few simple soil-building processes through the boys than in any other way. For this purpose we want several hundred boys, scattered over North Carolina, representing all types of soil, to join the Crop Rotation Club. In this club we shall base our prizes largely upon the per cent of increase in crop yield. The Division of Agronomy of the Experiment Station is cooperating with us in furnishing instructions as to the best crops to plant, their cultivation, fertilization, etc. The legumes, both winter and summer growing, will be emphasized. Therefore, if you have or will put in a winter cover crop you have started your Crop Rotation work.

We prefer having boys join this club whose age permits them to remain a member at least three years before passing the age limit of 18 years. The boys joining this club can still be a member of the Corn Club.

Through this club we are not only making it possible for the boy with poor soil to have an equal showing with the boy who has rich land, but we shall get some results which will prove invaluable to the State of North Carolina.

Take this matter up with your father immediately and if he is willing to cooperate with us in this undertaking, you and he sign the blanks below and return at once:

Dear Sir: I hereby make application for membership in the Boys' Crop Rotation Club, and agree to select at least 2 acres of uniform, poor soil, follow your instructions for at least 3 years and keep a complete record on blanks which

shall be supplied. Should anything occur to prevent my following this up 3 years I shall arrange with my father or someone else to carry it on.

Name of boy.

I hereby agree to furnish my boy the land for the Rotation Club, and to let him have what profit he makes.

Name of father.

T. E. BROWNE, Ass't. In Charge Boys' Club Work.

We hope fathers will co-operate with us in this work. Let us endeavor to make Stokes county the leading county in this work. We can do it. We have the soil and we have the boys. So let's line up and see what a grand showing we can make in the work. It will not only mean much to us in the way of production, but the early training the boys receive will mean much to them in after life.

W. P. HOLT, County Agent.

Moved to King

Mr. and Mrs. A. D. Dodd removed the past week from their former home at Francisco to King, where they will reside during the coming winter and probably longer. Mr. Dodd will not engage in any business at King.

Chronic Constipation.

"About two years ago when I began using Chamberlain's Tablets I had been suffering for some time with stomach trouble and chronic constipation. My condition improved rapidly through the use of these tablets. Since taking four or five bottles of them my health has been fine," writes Mrs. John Newton Irving, N. Y. For sale by all dealers.

Business Man Praises Dr. Miles' Heart Remedy

Successful Merchant After Investigation Found a Remedy That Restored His Health.

"This is Thanksgiving day in the state of Pennsylvania, and I want to devote a part of it in writing a letter to you.

On the 26th day of November, 1915, I was stricken with heart trouble. My family physician called it Angina Pectoris. I had from one to five attacks in 24 hours, in the latter part of December, 1915. I wrote to the Miles Medical Co., for information concerning my case, and in reply I received a very kind and instructive letter, which I handed to my family doctor, and he told me to use your Remedy in connection with the medicine he gave me, so I did. I used five bottles of Dr. Miles' Heart Remedy and seven bottles of Dr. Miles' Nervine and I was confined to the house for about four months. The action of my heart is now, and has been normal for the last six months. I can truly recommend Dr. Miles' Nervine and Heart Remedy to do what they are intended for. If used according to directions, I thank you kindly for your advice in answer to my monthly reports. I am now sixty-seven years of age, have been in the mercantile business for thirty-five years and lived retired for the last thirteen years."

A. B. HOLLINGER, Lincoln, Penna.

Dr. Miles' Heart Remedy is sold and guaranteed by all druggists. MILES MEDICAL CO., Elkhart, Ind.

This is the BEST Saw Mill

The Twentieth Century

Every Single piece is guaranteed. We make these variable belt feed and center friction feed saw mills of the best tested materials throughout. Steel headblocks and cable drive. Economical.

Write for descriptive catalog of all sizes of saw mills, planers, posaws, edgers, etc.
