Influenza Germ Has Been Discovered

Hopes of thousands of sufferers from epidemics of influenza for a cure or preventive of the disease were raised Saturday by the announcement of the discovery of the cause and the isolation of the germ.

The announcement was made by Dr. Simon W. Flexner of the Rockefeller institute of the medical research, who attributes the discovery to Dr. Peter K. Olitsky and Dr. Frederick Y. Gates, also of the institute.

The isolation will permit experimentation with antidotes and antitoxins. So small is the germ that it must be magnified 1,000 times before it is seen distinctively under the microscope. The germ lodges in the nose and throat during the first 36 hours of influenza infection, then attacks the lungs in such a way as to make them susceptible to other germs in the nose and throat, notably those of pneumonia and bronchitis.

County Highway Engineer N. S. Mullican was here today attending to business in connection with the road work in the county. The road forces are not able to put in full time these days on account of the terrible weather.

WHISKEY AND CAR ARE SEIZED

Deputy Sheriff Ashburn Made Rich Haul On Pine Hall Road Friday—Driver Escaped—Whiskey In Stokes Jail.

Deputy Sheriff Ashburn, of Pine Hall, assisted by J. H. Carter, captured a new Ford touring car and about 75 gallons of whiskey near Pine Hall Friday afternoon. The driver of the car escaped but the whiskey and car were brought to Danbury and turned over to Sheriff J. F. Dunlap.

Traveling with the whiskey car was another car occupied by a white man and a negro and when the officers stopped this car the driver of the one which had the liquor jumped out of the car and ran.

It is thought by the officers that this is one of a fleet of automobiles carrying liquor from Virginia to points south. The car that was captured Saturday had been seen passing along the Pine Hall road three times within the past few days, it was stated.
