How I Stopped Wastes In My Household

I found that my greatest waste was in the kitchen. I cooked too great a variety and too great a quantity of food at every meal. I bought a book on the nutritive value of food and sent for the government bulletin on the same subject. From studying these I have learned how to plan cheaper meals that are just as nourishing and appetizing as the ones I used to serve. I am careful not to cook too large a quantity at a meal, so do not waste anything in left overs. I have been surprised to find how much I save. Our grocery bills last year were a third less than the year before. I am careful to mend all our clothing at the first sign of wear which is a very real economy also. Mrs. J. G. W., Panola county, Miss.

Congress No. 2

Statistics have proven that only one-half of one per cent of the speeches made in Congress are listened to. A great many Congressmen speak IN, but not TO, Congress. But every speech is published in the record. They send the records back home to show "What they told 'em up there in Washington." Now the people back home think Congress heard their "Lem," tell 'em this.

Now, here is my scheme to stop speech making. A Bill reading as follows: "Congressional Record must not only contain speech, but number of members, and names who listened to speech, and why." For instance: "Congressman Post this morning at a point of information and spoke at length on 'Is Learning a town, or is it a Treaty?' Length of speech without waiting for a quorum, four hours, thirty-six minutes, attendance, four (Rep. N. Y. C. Chandler got out, sixty minutes, then N. J. Case of education, listened to mine, Lovejoy, then M. C. I was asleep, and the good speakers haven't returned yet."

Now, when they will stop or me, I'll know. The minute he gets up, I'll know that "Lem" is sick. He'll be in there, "Lem" will be talking. You know, they won't listen to a word he says. They have gone out to smoke, that's why, and you know why they've gone out to smoke. Will "Bull" Durham of course. IT'S BETTER THAN ANY SPEECH EVER MADE.

Will Rogers I'm. There will be another piece in this paper soon. Look for it.

To Those Who Judge Quality by Price The quality of Ford cars cannot be judged by the prices at which they are sold because Ford prices are made possible by conditions that are absolutely unique in the automotive industry. From mine to market the Ford car is the work of a single organization. The Company owns and operates the mines and forests that furnish the raw materials for its products. This material is carried over Ford transportation routes, fabricated in Ford mills, manufactured in Ford plants, and the finished product is sold to the public through Ford dealers. The following statement, previously made in an advertising message, is repeated because of its significance to the public: "If any other manufacturer endeavored to produce a car similar to the Ford, according to the high standards of quality in material and workmanship used by the Ford Motor Company and with the same tried and proved design, it would be impossible to offer it at anything like Ford prices. And it is well to note that even with less costly design they have not met Ford prices."
