

MOVING DAY FOR DEPARTMENTS

Revenue Bureau Goes Into New Half - Million - Dollar Structure.

Raleigh, Aug. 19.—Moving day in the State Departments today sent the Department of Revenue from its old quarters in the Agricultural Building annex to the new half-million dollar Revenue Building across Capital Square, and inaugurated a general shifting of locations by a half-dozen other departments and bureaus.

The old quarters of the Revenue Department back of the Agricultural Building will be divided among the Department of Conservation and Development, the Adjutant General's Department and the Department of Charities and Public Welfare.

State Forests Offer Healthy Vacations

A pleasant, healthful way to spend a vacation is to camp in the National or state forests. Public camp sites for the use of tourists and others have been established at practically all of the forests.

Information may be secured from the Forest Service, Department of Agriculture, Washington, D. C., and from the forestry departments of your own state.

No Such Thing As Wet Or Dry Moon

One of the commonest and likewise one of the most unreasonable weather superstitions, says the Weather Bureau of the United States Department of Agriculture, is the belief that if the horns of the new crescent moon tip downward, is a "wet" moon, portending rain.

The position of the lunar crescent depends upon the angle that the moon's path makes with the horizon and on any given date it is always the same in places having the same latitude. If the date throughout a belt of latitude is the same, either dry or rainy, would prevail on any given date throughout a belt of latitude extending entirely around the globe.

Near the Equator the position of the young moon never makes an angle of more than 30 degrees with the horizon, and it is generally in an even more nearly horizontal position, so that in a part of the world notorious for regions of heavy rainfall, the moon is, according to the proverb, always a "dry" one.

Baptising Sunday At Buck Island Bridge

A large congregation was in attendance Sunday morning at the baptising in Dan river at Buck Island bridge just north of Danbury. Mrs. Cleve Lawson was immersed and became a member of the Primitive Baptist church.

20,000 AUTO TAGS ISSUED AT WINSTON

Winston-Salem Bureau Has Already Collected Total of \$280,379.

Winston-Salem, Aug. 20.—Twenty thousand automobile licenses have been issued and \$280,379.75 collected by the bureau of the Winston-Salem Automobile Club, it was stated yesterday after a check of figures.

Figures quoted are from July 1, 1924, to July 1, 1925; and from July 1, 1925, to July 1, 1926.

Last year the bureau distributed in Forsyth, Yadkin, Davie and Stokes counties. This year Surry, Alleghany, Watauga and Ashe have been added, but the bulk of the automobile using population is in the four counties first served by the bureau, it is believed.

The increase of the Winston-Salem district is far greater in proportion than that of the State. The increase of the entire State is but \$327,659.57.

God Hears Strange Prayer When Man Is Bitten By A Snake

Newton, Aug. 20.—A few days ago Nathaniel Loudermilk, a good natured but rather Godless man of east Newton, was in his garden picking tomatoes, and suddenly he felt a stinging sensation in the calf of his right leg.

Becoming alarmed at what had happened to him, he ran quickly to the house and told his wife that he was snake bitten, and then asked her what he could do. She told him that in her opinion the first thing he ought to do was to pray.

"Oh Lord! this is Nathaniel Loudermilk, of 371 Smyre street, Newton, N. C. I was in my garden a little while ago trying to gather a few tomatoes, and accidentally stepped on a big snake, and when I did the damned thing bit me in the leg. Amen."

Fruit and Truck Growing Increased

The standard of living in the United States has risen by leaps and bounds in recent years. A true indication of this fact is seen in the increased quantity of fresh fruits and vegetables that are used, because just as the consumption of these increases does the general standard of living rise.

Records kept by the railroads show that in 1917 there were 412,178 carloads of fresh fruit and vegetables shipped in the United State. This increased last year to 963,442, or 133 per cent.

In no section of the United States has the percentage of increase in the production of fruits and vegetables been greater than in the South. They are being produced in ever increasing quantities. That is why both truck and fruit growing are becoming so increasingly important as the years go by.

Are Your Children In Good Health?

What about the youngster who starts to school this fall, Are his teeth in good shape; are his tonsils all right; and his weight up to normal? The child who begins school with the handicap of poor health hasn't a fair chance competing with his huskier playmates.
