## New Ford Car Coming Soon

Henry Ford probably could sympathize with Newton last week when his first complete car—body, engine, wheels, paint and all—came off the line, with Ford and his son Edsel looking on. The car was taken to Henry Ford's museum and put beside the fifteenth million Ford of the old type.

The new car, absolutely different from the old Ford model, makes fifty miles an hour easily, according to a description of the New York Times, sixty miles if desired. Ford has increased production capacity so that he can turn out 11,000 of the new cars every day, more than three million a year. The maximum of the old car was 8,000 a day.

Sixty thousand cars are needed as samples for the Ford agencies alone, and 375,000 have already been ordered and a down payment made before the cars are ready.

## STOKES COMPANY SPREADING OUT

Pine Hall Brick Co. Increased Capital To Half A Million—Buys More Land and Will Make Clay Pipe.

The Pine Hall Brick Co. has recently increased its capital stock from \$300,000 to \$500,000 and will install machinery necessary to manufacture sewer and drainage pipe in addition to making brick. A few days since the company purchased a tract of land of 414 acres adjoining the original property of the company.

The new plant for making pipe is now under construction and when finished will turn out 100 tons of pipe per day. The plant and additional land purchased will cost around \$250,000.

The Pine Hall Brick Co. is already operating the largest facebrick plant in North Carolina. The force at Pine Hall will be doubled to take care of work at the new plant, when it is opened in the spring.

## Dr. R. H. Morefield Injured By Car

While enroute to Danbury from Winston-Salem Saturday afternoon, Dr. R. H. Morefield was painfully bruised when a car ran into his machine from behind at a point near Walkertown. Dr. Morefield came on to Danbury after the wreck but later went back to a Winston-Salem hospital for an examination. It was found that his bruises were not serious and he returned after spending a day or two in the hospital.

The Chrysler which ran into Dr. Morefield's car was driven by W. T. Pardue, of Wilkesboro, and was a U-drive-it car. The front wheels were torn off of the car. Dr. Morefield stated that he was traveling at a speed of 30 or 35 miles an hour when hit and he thinks the car that hit him must have been making at least 60 miles an hour. No other car was passing or in sight and Dr. Morefield is at a loss to understand why the man ran into his car. A warrant was issued for Pardue Tuesday and placed in the hands of officers. He had not been located today.

## Credit Dollar On State Licenses

Raleigh, Oct. 26.—Holders of county hunting licenses who desire to take out State licenses will be allowed credit for the dollar paid to the State for the county license, according to instructions sent out by J. K. Dixon, assistant director of the Department of Conservation and Development, to all selling agencies.

When such an exchange is made, Mr. Dixon declares that it will be necessary for the licensee to pay the issuing fee as required by the law to the selling agent. In each case a new application must be made out.

These instructions have been given, Mr. Dixon explains, to meet requests of many hunters over the state, who declare that they purchased the one-dollar county license before they knew that the five-dollar State licenses were obtainable.
