

FEDERAL AGENTS MAKE RECORD

Osteen and His Aides Have Made Life Miserable For the Bootlegger.

Greensboro, Nov. 4.—J. L. Osteen and his 12 Federal agents in the middle district of the State have made a record for prohibition enforcement in Carolina during the last six months. It is found from reports filed here today.

The middle district agents have arrested 362 men since the middle of last May, have destroyed 355 stills, poured out 1,534 gallons of whiskey, and 383,390 gallons of beer or mash. They have seized 53 automobiles, and hold seized property worth \$21,146, while property destroyed by them as scenes of stilleries was worth \$196,740.

Reports for October show 60 stilleries, out of 230 gallons of whiskey, six gallons of wine, 61,565 gallons of beer, poured out and 62 men put under arrest or named in warrants.

Value Of Lime Depends On Magnesia

Raleigh, Nov. 7.—The value of ground limestone used on land to be planted to tobacco depends largely on the magnesia which the lime contains.

"When magnesia is deficient in the soil and is not supplied by the fertilizer or by liming, the yield and quality of the cured tobacco may be greatly lowered," says E. G. Moss, director in charge of the Tobacco Branch Station at Oxford. "The symptoms of magnesia deficiency are readily recognized on the growing plant. The material can be supplied by potash salts containing magnesia and by ground limestone. Our results do not show any great benefit from liming other than from the magnesia supplied by the limestones used."

Mr. Moss states that results at the Oxford Station show that a characteristic chlorosis which lowered the yield and quality of the tobacco produced could be corrected by using the dolomitic limestone. This limestone also increased yields and improved the quality. The trouble was also remedied by using potash salts carrying magnesia. The value of dolomitic limestone as a remedy for this chlorosis or "sand-drown" does not depend on its action in correcting soil acidity. A clear distinction is to be made between the use of lime, as such, for tobacco and the use of dolomitic limestone as a remedy for sand-drown or magnesium deficiency.

In the tests at Oxford, Mr. Moss has compared calcite and dolomitic limestones and finds that the use of ground limestones on these soils is not likely to give marked increases in the yield of tobacco unless the dolomitic form which carries a considerable quantity of magnesia is used. Where no lime has been used previously, Mr. Moss advocates a heavy application of about 1,000 pounds per acre of the dolomitic limestone applied broadcast. He states that the use of calcite limestone apparently does not give any permanent beneficial results. Where used continuously, it has a tendency to decrease the yield and injure the quality.

Nearly every acre of land planted to tobacco and peanuts in Martin county this year has been planted to a cover crop. This means that between 30,000 and 35,000 acres have been so planted.

TODAY—RESPECTED TOMORROW—AN EMBEZZLER

The public sees that picture. But you, the employer, see your loss, temporary financial embarrassment, or failure.

The most trusted employes always are in posts of greatest responsibility. Often the temptation is too great—the opportunity for defalcation too easy.

Protect yourself with a fidelity bond. The cost is comparatively small. And you can bond either a single individual or your entire force.

CANCER

DON'T wait until your cancer hurts before applying for treatment because then your best chance of successful treatment is past.

Do increase your respect for your family physician if he advises you to seek the advice of a specialist when symptoms of cancer appear.

Do write for free booklet, "CANCER AND SIMILAR AFFECTIONS, their Detection, and Treatment."

Remember: Over 100,000 (one hundred thousand) people are dying annually, in the U. S. alone with cancer.

Camel

Made for one purpose —to promote pleasure

Camel is attuned to the mood of the smoker who seeks pleasures rather than panaceas. Offered as a cheer not as a cure.

If all cigarettes were as good as Camel you wouldn't hear anything about special treatments to make cigarettes good for the throat. Nothing takes the place of choice tobaccos.
