A dual discharge airplane type oil pump forces oil in two streams to both ends of the motor in Hudson's Great Eight. This pump, which employs an oscillating plunger, delivers three times as much oil as the pump used in former models.

As an extra precaution against body weaving, all channel pieces in the Hudson Great Eight bodies are flanged or bent along the edges for additional strength. This reinforcement measure is one of the features of Hudson's body construction.

IT'S WISE TO **CHEVROLET** CHOOSE A SIX

## Drive a Six and you'll buy a Six

Once you drive a six-cylinder car, you will quickly recognize its finer performance! For a Six is so smooth . . . quiet . . . flexible . . . and comfortable! And the six-cylinder Chevrolet is one of the world's lowest priced automobiles. It costs no more for gas, oil or upkeep than any other car you can buy. Come in—today. In a few minutes you will see what fine quality is built into the Chevrolet Six—and what real value it offers.

### Some Distinguishing Features

50-horsepower six-cylinder motor . . . de luxe wire wheels at no extra cost . . . a wide variety of attractive new colors . . . modern, long, semi-elliptic springs . . . fully-enclosed four-wheel brakes . . .
