

TEACHERS MEET AT GERMANTON

Discussion of Matter of Athletics In the Schools—Program To Be Given On October 22.

Lawsonville, Oct. 14.—The work of the Superintendent of the Stokes county Schools and the principals and coaches of the larger schools of Stokes county is well under way. On October 10, 1930, the county superintendent had the principals and coaches to meet him in the school building of Germanton, where Mr. Carson pointed out some of the duties and opportunities of those whom he had asked to be present. Also a part of this meeting was given over to a discussion of what should the schools represented do this year in the matter of athletics.

The following program will be given by this group at an evening session which will begin at 7:30 o'clock October 22:

1. Talk—The Proper Relation of Any School of Stokes County to the Stokes County School System—Mr. P. W. Jones, Principal Pinnacle School—3 minutes minimum.
2. Report of Athletic Committee—Chairman Athletic Committee.
3. General Discussion of Report of Athletic Committee.
4. Talk—Solutions of the Most Outstanding Attendance Problems—Mr. W. C. Voorhees, Principal Pine Hall School—5 minutes minimum.
5. Talk—Interest Stokes

County Schools Should Take this Year in Debating—Mr. R. S. Gardner, Principal Germanton School—5 minutes minimum.

6. Discussion and Organization—if organization is desired—of a School Masters' Club—Discussion lead by Mr. C. C. Carr II, Principal King School, who is also to be chairman of this meeting, and who may direct as seems wisest.

Following the business session of this conference there will be a social period at which refreshments are to be served.

Exporting Volsteadism

Officially "dry" Uncle Sam ships more than a million dollars worth of his non-intoxicating beverages abroad yearly. The flow of American fruit juices, malt extracts, and mineral waters abroad has increased 300 per cent in seven years, reaching a total value of \$1,763,121 in 1929. We are not quite so eager to buy these same beverages from other nations, however. Imports during 1929 were valued at \$382,153 less than exports.

Many will see irony in the fact that Canada, eagerly visited by Americans of pre-Volsteadian thirst, is the chief purchaser of American ingredients for making pop and soda fountain drinks. Other countries which relish innocent refreshment of this sort include the United Kingdom, South America, New Zealand, Australia and China. Our imports consist largely of ginger ale and ginger beer from the United Kingdom and of lemon, lime and sour orange juices from the West Indies, the United Kingdom and Italy.

However, our contributions to the world's aridity are somewhat offset by our aid to Britany's wine industry. Grape vines from the United States

are being imported into Britany to give new life to that region's famous grapes which have withered under a plant disease. The experiment is said to be highly successful.

Policeman William Hicklin of Nottingham, Eng., put in an ambulance a woman fatally hurt by an auto, and when the hospital was reached he found Edward Gingsley, a farmer near Glasgow, was heavily fined for putting tin masks on his cows "to keep them quiet."

The Morrisett Co.

"LIVE WIRE STORE."

FACTS:—When their first baby came, Mr. Jones bought a baby buggy, when the second arrived he put on balloon tires, when the third put in his appearance he added four wheel brakes and when the fourth came it was necessary to add a rumble seat. Now that they have twins, Mrs. Jones has ordered a stop light.

Morrisett's put the stop light on competition about ten years ago.

THIS WEEK:

Money in Circulation

Is what makes business good. If every dollar that comes into the hands of farmers, merchants and others this fall is immediately put into circulation, whether prices are high, low or medium, business conditions will naturally improve.

First, if there are any debts owing, they should be paid. Then, if there are necessities required for the family, farm or home, they should be purchased. If there is a surplus after these two items are taken care of, it should be placed in the bank on interest for future needs.

By following this program every dollar will do its bit and business will be good.

Let's work together. Let's keep the money in circulation.
