increased this year from 70 to 85 per cent. of the base acres and pounds. This means, if carried out, an increase of about one in five acres and twenty per cent. increase in production allotments over last year. This figure as announced will give a total production for the Flue-Cured Belt of approximately 700 million pounds as compared with a production allotment of 545 millions for the Flue-Cured Belt in 1934.

There is much discussion on the subject and some difference in opinion as to whether this increase in production will not be accompanied by a price decline. Several local growers, questioned on the subject, have stated that they are not in favor of an increase other than for growers with small acreages and possibly those who have contracts in which the production allotment are inequitable. Laurie Mabe, well known local grower of the Peter's Creek Section says: "They need not give me anymore. I am satisfied with what I have. Four acres gives me all the work I want to do. I had rather grow that and get pay for it."

J. L. Tucker, Committeeman from the same section says: "I had rather see us try it another year at 70 per cent. with some minor changes in contracts which require it than to increase production now."

John L. Christian, County Committeeman says: "I am willing to leave this question to our leaders who are in position to know what the market will stand."

and land-lords are again cautioned that under the contract the number of tenants or share-croppers cannot be reduced below the number so engaged in 1933. This is plainly stated in section 12 of the contract, which holds not only for 1934 crop year but also for the crop year of 1935. Any failure on the part of anyone to carry out this section shall be considered a breach of the contract.

As stated heretofore this does not mean that a tenant shall be required to live on the same farm or that the land-lord may not change tenants if he so desires, but it does mean that the number of tenants or share-croppers engaged in the production of tobacco on a given farm shall not be reduced in 1934, to less than the number so engaged in 1933.

Information reaching this office indicates that this section of the contract has been abused a great deal more in other sections of the State than it has here.

KIRBY, County Agent.

Hints for Homemakers

By Jane Rogers

HOUSEWIVES can help to relieve unemployment distress by putting up, along with their own preserves, a number of extra jars for distribution to needy families next winter. Preserves are a valuable form of relief food, their fruits or vegetables furnishing vitamins and their sugar content providing an unexcelled source of energy.

White spots on the table top or other furniture can usually be removed by rubbing, first with wood alcohol, and then with a piece of flannel moistened with camphorated oil.
