

THE DANBURY REPORTER.

Federal Government Says Build Now

One thousand new homes are needed in Stokes county, and more than two thousand need remodeling or repairing.

The United States government says to every citizen--BUILD NOW.

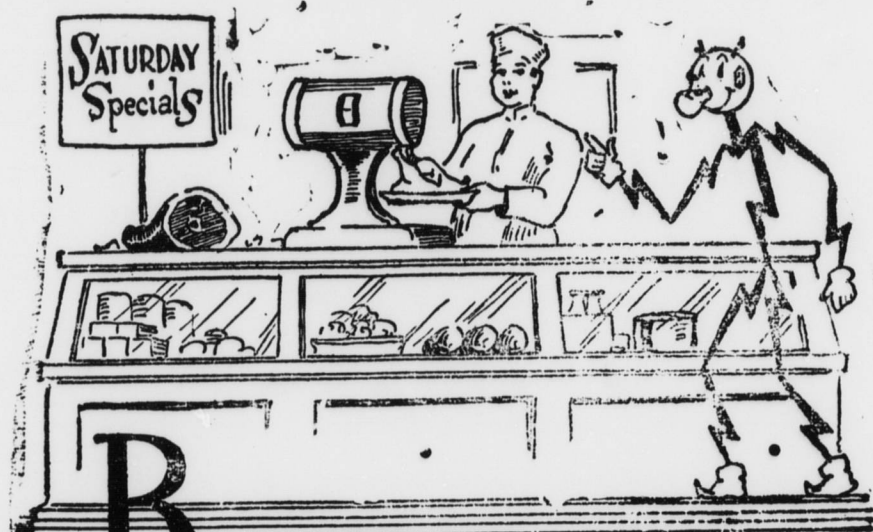

Labor and materials will go higher, everything that goes into the making of a home will steadily increase in price.

You can get the money through several government agencies to build a new home, or to repair or improve the home you already have.

Build Now--Why wait? There is no investment worth more to you than a good comfortable home, cool in the summer, warm in the winter, and furnished for your pleasure and comfort inside.

See the array of builders, contractors, furnishers, in this issue of the Reporter, and make immediate arrangements to complete for yourself and your family a good, comfortable, convenient home.

Electric Refrigeration Affords Great Savings Because You Can

BUY WHEN PRICES ARE LOW!

Electrical Refrigeration Definitely Cuts The Cost Of Better Living!

One of the outstanding savings features of an Electrical Refrigerator is that it enables you to take advantage of the low week-end special prices and buy your meats and other perishable foods in larger quantities. This feature alone, in most families, will take care of the payments on an electrical refrigerator to say nothing of the savings through elimination of losses through food spoilage . . . and the convenience, comfort, safety and other advantages of electrical refrigeration are still to be considered.

Duke POWER COMPANY

Specialists Offer Mid-Summer Advice

Many mid-summer farm tasks about the farm and home require information and suggestions which State College specialists are offering on the Carolina Farm Features radio program.

Some crops are being harvested; others are just being started, and there are others not yet ready for harvest which are being cultivated.

The agricultural experts are arranging their discussions to conform with timely practices. Insects and plant diseases take

them toll yearly. Yet many dollars could be saved each farmer if he would follow presentatives and control practices.

Already this year the flea beetle has damaged thousands of dollars worth of tobacco in northwestern counties.
