Silenced.

(Union Republican.)

The Danbury Reporter in double-barrelled editorial in the issue of July 1, called Stokes county "the red-headed stepchild." Why? Because the Roose alphabetical commissions with its numerous ramification: and the Hoey administration with lots of favors to bestow had passed poor old Stokes by, and this in face of the fact that for the past few years Stokes has deserted her time-honored tradition and strayed off after strange gods politically.

The Reporter Says:

"A cogent subject for investiga-tion might be: 'What in the his the matter with Stokes county? Why is Stokes the red-headed step-child in the family of North Carolina counties? Why in the dispensation of honors, de serts, rewards and emoluments from the State and federal administrations, is Stokes always forgotten or ignored? And why sit we supine and indifferent? Is there no native pride, patriotic consciousness or cave-man resentment left? You ask what, where for, why? And the answer is: Our district judge is a citizen of Surry. Our solicitor is a citizen of Rockingham. Our district highway commissioner is a citizen of Wilkes. Our district prison supervisor flives in Iredell. Our district highway engineer lives in Forsyth. Our county agent hails from Alamance. superintendent comes from Orange. Our federal seed loan chief emanates from Wake. Our WPA boss is in Forsyth. Resettlement administrator is of Forsyth. Our district health physician-director is of Forsyth. Our sales tax is collected by nonresident officers, our accounts are kept by alien suditors.

"Are we the victims of a fatel 'complex'? Do we every time we hear the zoom of a silver bulk floating in from the ether spect to see a new furreign 'official' and from somewhereanywhere except from a home port?

"Why nobody from Stokes when it comes to filling positions honor, of dictatorship, of emolument of salary?

"Do other counties have a monopoly of attainment, of fitness of excellence and merit?

"Are the citizens of of Stoke fit only to be the hewers of wood,

or the drawers of water?
"Are there no men and women of education, character, efficiency

and worth in our home county? "There is no criticism or reflection have on the above-mentioned officials. They are men and women of character and ca pacity, of efficiency and useful-

"What we mean is -what is the matter with Stokes county?

"This newspaper for one believes the time has come for us to assert our native pride, ind pendence our assurance and our determination not to submit further to this unfair discrimination, this brutal ignoring our rights."

But this is all changed now. The past week Editor Pepper whom we presume penned the above lines was hit in the belly by a political pone when he was appointed by Governor Hoey a member of the State Board of Charities, and Public Welfare. 'Tis true there is not much pay in the office, he will get his per ch m and mileage while attending a meeting and maybe the petticoat boss of the department may give the Danbury editor some special work to do that will help him to raise a few extra

The editor must have forgotten that his "better half" did for atime hold down some alphabetical job in the Stokes dole department and may still be holding the job yet for all we know. New Deal. His mouth is now lent toward "my plans" and the Democratic ring.

Outlook Justifies **State Participation** In New York Fair

Whalen Voices Opinion in Inviting Governor and People to the 1939 Exposition

NEW YORK, (Special).—In a letter of invitation to the governors of 47 ctaes, Grover Whalen. President of the New York World's Fair 1939 Corporation, points out that the commercial consequences of the international exposition under construction in New York City are so great and important that they alone would justify the active participation of svery state in the nation.

"Fifty million persons from every walk in life, from every country in the world. are expected to attend the Fair," writes Mr. Whalen. "The great American market with its tremendous consumer purchasing power will be represented by these visitors. They will comprise a true cross-section of America."

The World's Fair, according to Mr. Whalen, will be a magnificent spectacle, entertaining and instructive. It will attempt to answer the questions: "What kind of a world are we building? What kind of a world can we build?" With collateral improvements, it will represent a total investment of more than \$125,000,000 by the Fair Corporation and the governmental, industrial and other participants. The Fair site park is a tract

\$125,000,000 by the Fair Corporation and the governmental, industrial and other participants. The Fair site park is a tract of 1216½ acres, almost at the geographical and population centre of New York City.

Construction of buildings and roads, grading, dredging, planting and land-caping are already under way, based upon a schedule which calls for completion of all construction operations before January 1, 1939, to allow four months for tion of all construction operations before January 1, 1939, to allow four months for final decorations and installation of exhibits preparatory to the opening of the Fair on April 30.

The opening date commem-raise the inauguration, on April 30, 1739, of George Washington as the first President of the United States.

Washington as the first President of the United States.

In the government area, and near an imposing federal hall to be erected by the United States Government, the Fair will provide a "Hall of States" in which the significant contributions of each state in laving the foundations for the better World of Tomorrow can be proudly displayed, says Mr. Whalen.

His letter supplements an invitation to participate in the Fair extended to the covernment on November 30 by Governor Horbert H. Lehman of the host state of New York. Covernor Lehman pointed out that the State of New York has already appropriated, to date, \$2,130,000 for commencement of construction of boutlevards, service roads, bridges, and certain other basic improvements the State will make at the exposition site or its appropaches. The New York legislature, further, during 1936 passed an act creating the New York World's Fair Commission of 13 members and providing funds in aid of this body's preparation of plans for a state building and with the New York woulding and exhibit and for active state participation d for active state participation

"Nation's Fair" Their Objective

Mrs. Vincent Astor Winth op W. Aldrich

NEW YORK (Special) .- Mrs. Vincent NEW YORK (Special).—Mrs. Vincent Aster, society leader and civic worker, has been appointed Chairman of a Na-tional Women's Advisory Committee for the New York World's Fair of 1939. Win-throp W. Aldrich, Chairman of the Chase National Bank, is heading the men's Na-tional Committee, Together they will en-lit more than 19,090 committee workers in a nationwide campaign to arouse in in a nationwide campaign to arouse in and create support for the New York Fair. Grover Whalen, President of the Fair Corporation, has announced that State Chairmen will be named later and that every state will be brought into ac-tive participation in the New York Fair. making it truly nat onal.

Miss Katherine Nicholson, of East Bend, formerly county nurse of Stokes county, was a visitor here Tuesday.

It will be observed that the stopped from talking about Hoey Stokes editor was not very vio- or any of the rest of the State

Nations of World Allot Year 1939 To New York Fair

World Exposition Already Growing Up; Seeks Active Participation of State

NEW YORK, (Special).—The New York World's Fair, in which every state in the nation must inevitably take small or prominent part, is out of its infancy. Preparatory construction goes on night and day at the Flushing Mead: W Site of 121614 acres at the geographical centre of New York City A steady flow of activities and announcements emanates from the Fair Corporation neadquarters on four floors of the Empire State building, Judging from all of these, the Fair is a lus'ry, growing institution that will a lusy, growing institution that will reach full maturity—no question about it—by the scheduled spening day, April

reach full maturity—no question about it—by the scheduled opening day. April 30, 1939.

The task of grading the site is about half completed. Battalions of men with trucks have already moved over 3,000,-000 cubic yards of dry fill in the process of turning the waste marsh land, of the Flushing River basin into park ground. Other battalions are scooping out "meadow mat" for use as fertile top soil for the made lands, and in so doing excavate the beds for the two large lagoons featured in plans for the Fair.

The first of the 300 structures which, according to estimates, will house the 1939 Fair, has been completed and is read, for occupancy. This is the headquarters building for the field forces of today and the employment department of the exposition period.

quarter's diffiding for the field rotres of today and the employment department of the exposition period.

Scheduled for early in the new year is the start of actual construction of the \$900,000 Administration building. The designs for this structure, let under architectural contract a few weeks ago, are nearing the day of their approval in the Corporation's offices. Upon completion of this building, late in August, 1937, the Fair headquarters, bag, baggage and sales offices, moves to the exposition site.

"The most splendid and significant edifice projected for the 1939 international exposition," the Theme building, as described at Fair headquarters, is also well along in its contractual period. The estimated cost of this great building for the "Thematic Centre" of the exposition is set at \$1,200,000. The preliminary designs are to be finished in about eight weeks and the final plans submitted within four works thereofice. Construction is seeded. and the final plans submitted within four weeks thereafter. Construction is scheduled to start immediately the designs are completed.

are completed.

From this Theme centre will radiate all that is to be the 1939 Fair as conceived by its funders and rendered into concrete terminology and model by the Fair's Board of Design.

"Our label forms on let or in place."

"Our job from now on is to give physical expression to the plan and theme

of the Fair as announced and as set down on paper in our headquarters." says Grover Whalen, President of the Fair

Or Ore Whalen, President of the Fair Corporation.

"Starting next April 1, we plan to complete the design of one major building every ten days for a period of seven months. In all, we expect to design no less than 30 major buildings to house the exhibits from every part of the world. Some 300 structures, in all, are planned for the Flushing Meadow site, within a few minutes' ride from Manhattan."

Without oblighting on the part of the Fair, more than 250 American business house and institutions have begun preminingly conversations regarding their participation and are already planning

participation and are already planning exhibits. Five of the great nations of the

participation and are already planning exhibits. Five of the great nations of the world have already assured the Corporation that they would erect their own buildings, while no less than 32 other nations have informally indicated their desire to participate.

And then, on top of all this display of keen interest, comes the announcement that the International Convention Bureau, meeting in Paris, has allocated the year 1939 to the New York Fair. This means that the New York Fair has exclusive ranking as the "one international exposition" of 1939, and assures it of the active support of the 21 nations signing the agreement.

President Roosevelt has just extended official invitation to the nations of the world. Governor Herbert H. Lehman, of the host State of New York, has extended invitation to the governors and residents of 47 states. Grover Whalen, likewise, has invited the governors in a letter pointing out that "the commercial consequences of the New York World's Fair are so great and important that they alone would justify the active participation of every state."

Fair Commissioners are already in Couth America and Europe. Still others are on their way to the Far East and other foreign shores. Mater Dennis E. Holan, retired, as head of the Department of Foreign, State and Municipal

Holan, retired, as head of the Department of Foreign, State and Municipal Participation, will himself make representation to the governors and legislatures of the various states.

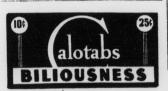

Meanwhile, under the direction of Harvey D. Gibson, President of the Manufacturers Trust Company, and Richard Whitney, former president of the New York Stock Exchange, the prominent figures in the financial capital conducted a 28-day campaign to sell \$27,829,500 in debenture bounds of the Fair to finance the construction period

debenture bonds of the Fair to finance the construction period.

Every confidence is being expressed that the Fair not only will "pay its way." but that it will bring a oillion dollars more of revenue into Greater New York and stimulate American industry in general to an extent many fold that amount. The total cost of producing New York Fair, including collateral improvements, is set at \$125.000,000. Statisticians estimate that the attendance will total more than \$5,000,000 persons.

The City of New York, the State of New York, and the Government of the United States, according to expectations, will account for \$35,000,000 of the total expenditures and thus jend an official

backing never before achieved.

Hints for Homemakers By Jane Rogers

SELF-STARTING electric clocks

SELF-STARTING electric clocks regulated by alternating home current have a definite appeal to the modern woman. These clocks are not only punctilious time keepers but they come in such a variety of colors and styles as to make it possible to choose a clock that will harmonize with the decorative scheme of any room in the house. Beautifully tinted glass clocks and charming timepieces in wood and plastic play an important role in room design. The Telechronmotored clock illustrated, for example, has been especially designed to appeal to the feminine whim. It is styled of glass with mirror finish. Imitation "Cloisonne" finish on metal makes the dial which is encircled with black etched-in Roman numerals. In blue, amber or clear crystal this particular clock makes a charming timepiece for the boudoir or femine sitting room.

Did you know that by selecting Did you know that by selecting window shades in a continuance of color tone in which a room is decorated the room achieves a feeling of greater spaciousness? Larkspur blue shades—and incidentally Larkspur blue is one of the newest and smartest colors to make its appearance in cloth window shades—have been chosen to create just this effects.

ance in cloth window shades—have been chosen to create just this effect in a room papered in pale blue where the woodwork is painted in a contrasting durker blue. This new Larkspur blue window shade has been used with great effectiveness in bathrooms and bedrooms The color is a particularly good one for bedrooms as it keeps out the glare of the sudmer sun out the glare of the summer sun and makes for cool restful reeping.

New Miracles Of The Photoelectric Cell

By James D. Purdy Director, Schools of Electrical Engineering, International Correspondence Schools

ASTRONOMERS at the Wash-A STRONOMERS at the Washburn Observatory, Wisconsin, are testing the use of a photoelectric cell as an automatic guider for the observatory's giant telescope, thus relieving them of the onerous task of keeping the telescope trained on a particular star during the hours required to take a photograph. The light of the guide star is divided into two beams of equal brightness which are directed onto the lightsensitive surface of the photoelectric cell. If the telescope swerves in any degree from the proper position one beam becomes brighter than the other. This variation in brightness resulting in an electric preserved. ness resulting in an electric pressure in the cell, starts a motor which swings the telescope back into receiving

A photoelectric ce!! device has been developed for use at dangerous highway intersections and curves to check motorists who drive at excessive speeds. Two "electric eyes," set half a mile apart and connected with an automatic timer, measure the speed at which the car is traveling. If the speed is excessive the device flashes a signal ahead of the driver, warning him to slow down before the intersection or curve is reached.

MOTHERS

CLIP THIS OUT AND PASTE ON YOUR MIRROR. THIS IS WHAT GAITHER DAVIS HAS TO SAY ABOUT

YOUR CHILDREN'S FEET AND THEIR CARE:

THOSE precious little feet of children mothers so love to fondle! Have you ever stopped to think how delicate they actually are? During the tender years, instead of a solid foot structure, the little feet of children are merely 52 bony masses which do not even appear united, but as the child grows these little masses enlarge and assume proper shape, gradually meeting each other. Then they form the arches of the feet. It takes ten years before the general structure of the feet is completed, although certain details of the great heel bone are not perfected until after the twentieth year. Imagine it! Twenty years to grow a foot. No wonder it is so important to take good care of them.
