"Equal Rights to All . . . Special Privileges to None"

This is the fundamental principle upon which the American government was founded and which made possible the development of the nation.

Yet, the railroads - America's largest corporate industry and its essential transportation agency are denied equal rights, while their competitors are given special privileges. Hence, the critical railroad situation.

If rigid rate regulations and restrictions are sound public policy for railroads, then they are equally sound for other forms of transportation.

If it is sound policy for the taxpayers to furnish airports and beacon lights for airplanes; canalized rivers and locks and dams for boats and barges; and highways for motor carriers at inadequate charges, then it is equally fair for the taxpayers to furnish terminals, and to build and maintain tracks for railroads.

If it is sound public policy to tax railroad tracks and the cars moving on those tracks, then it is sound to equally tax the carriers of the highways, airways and waterways.

If it is sound public policy for the federal government to finance and operate the Federal Barge Line in competition with privately owned transportation agencies, then it is equally sound for it to operate grocery stores, department stores, factories, filling stations and other businesses.

The railroads, nor any other industry for that matter, cannot survive and prosper if our own government plays favorites - if the favored few are given privileges denied to others.

Perhaps most of our problems could be solved, if the people demand that our public servants strictly observe that fundamental principle, "Equal Rights to All-Special Privileges to None."

That is all the railroads of the country ask-that is all they are entitled to-but that is now being denied. And, so long as equality of treatment and simple justice is denied, the "railroad problem" will go unsolved.
