Would Make A Good One

Powell East of Vade Mecum was in town Monday. He says he has lately been troubled a good deal with rheumatiz, but is now better.

Mr. East would like to have the position of watchman or caretaker of the CCC camp, since this project has recently been temporarily abandoned. He would make a good man for this job, as he knows every hog path in the mountain, and would be especially efficient in the case of forest fires, and is very energetic and dependable.

BUT HIGHWAY CHAIRMAN BEN PRINCE GOES TO WASHINGTON TO GET PER- MISSION TO PUT THE PRO- JECT THROUGH.

The Reporter has received the following special from Raleigh:

Highway Commission Chairman Ben Prince said today he would do everything in his power to secure approval from the War Production Board for the building of the Hanging Rock State Park Road.

Work was scheduled to start within a few weeks and \$20,000 had already been allocated for the project, but under the recent blanket construction ruling of the War Production Board, work cannot begin on any project costing \$5,000 or more unless it has a preference rating or has received the approval of the board." Prince said.

Prince disclosed that he will make a special trip to Washington within the next two weeks to secure specific information from the officials of the WPB on the application of the construction order to road construction. Prince said that the Hanging Rock Road would be one of the projects he would bring to the attention of the WPB in order to secure the needed approval.

Prince said he sincerely hoped that plans for the two miles of road leading into the park from a point on NC 89 two miles west of Danbury would be carried through as planned.

Danbury Fishermen Bring Home The Meat

J. J. Booth and sons Jim and Alex made a fishing trip to the headwaters of the Dan river, up in the mountains of Patrick, early Monday morning. The sun was just gilding the tops of the trees to the east when they set in. The river at that place is just the size of a spring branch, and the fishermen threw away their hooks and lines and deftly into the clear stream, catching 65, which measured from 18 to 35 inches each. At some points the stream was dammed and overrunning its banks by a clogging of the current from big fish sleeping cross-ways.

Mr. Booth says it was very cold up there on the mountain and icicles long as steer horns were on each side of the road.
