Rural Bond Sales

Effective Step In Postwar Planning

WASHINGTON, D. C.—Secretary of Agriculture Claude R. Wickard today called on American farmers to invest all "extra" dollars in War Bonds during the Sixth War Loan beginning November 20 as an effective step in postwar planning for rural America.

Directing his appeal "To the Farm People of America," Secretary Wickard said, "The farm people of this country have an outstanding war record. It still takes a lot of money to finance the war, even though we are winning. The single task of supplying the Pacific theater is a tremendous undertaking. Add to that the equipment which was needed on the invasion coast of France, the supplies that are required now to knock down the walls of Hitler's Germany, and the total is staggering. So our job here at home is by no means over, just as the war on the fighting front isn't over. Our homefront responsibility is twofold: One is to stick to our job and do it well until total victory is won; the other is to buy War Bonds."

"The farm people of this country have an outstanding war record. They have achieved a production miracle in the face of wartime difficulties. Their bond-buying record is good, too, as indicated by the fact that farmers and their families purchased more than one and a quarter billion dollars' worth of bonds in 1943. This figures out at about 10 per cent of their net income."

"This Sixth War Loan campaign is the biggest yet for agriculture, but never before has agriculture had so many dollars that could be put into War Bonds. The record production of farmers, coupled with favorable commodity prices, has pushed their income up to an all-time high level. The investment of those extra, inflationary dollars in War Bonds would be the most effective step in postwar planning Rural America could take.

"Stake your share in the future—share your stake in the war."
