THE TOBACCO MARKET.

What Mr. Alex Walker Has to Say on the Subject.

In reviewing the market for the week we have to say it has been very satisfactory to all parties. When we consider the very cool, harsh weather, the breaks have been as full as we had any reason to expect and prices have been very good and the buyers say some grades have gone a little higher.

Having been requested to give our opinion upon the comparative size of the

North Carolina crop of tobacco for the year 1890, and not having any very reliable statistics before us, we can only give our opinion, founded upon our own observation and such other information as we have been able to gather by enquiries made of persons from different parts of the tobacco growing sections of the state, and from the best information we have been able to get, we feel safe in saying that the old tobacco growing sections planted a crop that was short in acreage, but at the same time the eastern counties that have in the past few years gone into the tobacco culture, have increased their acreage very much, which we think in a great measure brought up the shortage in acreage, and the very favorable seasons for growing the plant not only makes up for any shortage in acreage, but makes an excess of at least 10 per cent. in pounds. Now if we are correct in what we have here stated, it makes the 1890 crop of North Carolina tobacco 10 per cent. above a full average crop. That is to say this crop will weigh out 110 per cent. when brought to the scales.

A RARE TESTIMONIAL.

What Mrs. John Moring, of Pittsboro, Says of a Durham Company.

PITTSBORO, N. C., Sept. 28, 1890.

To the Durham Medicated Cigarette Co.: GENTS--I have used your Medicated Cigarettes for Headache and Insomnia, and have been greatly benefited by them. Especially for Sleeplessness. I have experienced more relief than from all other remedies that I have tried during the eight years that I have been a sufferer. Since using them I am almost entirely free from Insomnia, although I have discontinued them for nearly two months. I can further certify that they have been of great service to some friends to whom I recommended them for Bronchial troubles. Very respectfully, Mrs. JOHN M. MORING.
