

W. H. WILLARD, JR., Publisher and Proprietor.

SUBSCRIPTION RATES: One Year, \$6.00; Six Months, \$3.50; Three Months, \$2.00; One Month, \$0.75; One Week, paid to carriers, 15c; Published daily (except Sunday) and weekly.

THE WEEKLY GLOBE (8 pages) is the largest paper in the state and is sent to its subscribers a whole year for one dollar in the coin of the realm. It is printed each Wednesday night.

THE DAILY GLOBE is on sale in Durham at Berry's news stand, the Hotel Carolina and Gattis' book store. It will be found for sale on news stands in other towns.

The editor is responsible for every unsigned article that appears in its columns.

Anonymous letters invariably fall into the waste basket.

THE GLOBE is always glad to see its friends in the office on Church street.

THE GLOBE is entered at the postoffice, Durham, N. C., as mail matter of the second class.

DURHAM, N. C.

FRIDAY, SEPTEMBER 14, 1894

This Date in History—Sept. 14.

- 258—Martyrdom of St. Cyprinus, archbishop of Carthage, in Africa.
467—John Chrysostom, famous and eloquent preacher of Constantinople, died.
1321—Dante degli Alighieri, Italian poet, died; born 1265.
1547—Jan Van Olden Barneveldt, Dutch statesman and martyr, born; beheaded May 25, 1619.
1742—James Wilson, "signer" for Pennsylvania and afterward member of the continental congress and judge of the United States supreme court, born near St. Andrew's, Scotland; died 1798.
1807—Fulton first ascended the Hudson by steam.
1831—James Fenimore Cooper, writer of popular Indian romances and of the first history of the United States navy, died at Cooperstown, N. Y.; born 1789.
1832—The Duke of Wellington died at Walmer castle, England; born in Ireland 1769.
1862—Battles at the passes of South Mountain, Md., between the armies of McClellan and Lee; first important engagement north of the Potomac.
1893—Train on the New York Central railroad ran from New York to Buffalo, 499 1/2 miles, in 4 1/2 minutes.
1893—Brazilian insurgent ships opened fire on government forts at Rio Janeiro.

It begins to look as if the entire police force of New York will be turned out for bribery.

President Cleveland will not say yes or no to the report that he will speak in Wilson district during the campaign.

The town of Hubbard, O., was lately reported to be running itself. Both the mayor and city marshal are in jail, the former for intoxication and the latter for not obeying orders.

There is a store in New York where a person may have a song set to music while he waits, for fifty cents or a dollar, the price depending on the time it takes for the lightning composer to satisfy the applicant.

One of the innovations among the well women bicyclist at Long Branch is to have their groom follow them on wheels. The theory is that this custom gives the sport an ultra swagger character, besides insuring the presence of a faithful friend in case of an accident or a breakdown.

The long-suffering scribe of a remote southern paper gives vent to his pent up yearn in the following lugubrious strain: "The wind bloweth, the farmer soweth, and the subscriber oweth, and the Lord knoweth that we are in need of our dues. So come a runnin', this thout of dunnin' gives us the blues." That ought to fetch.

In selecting the twenty-five "immortals" whose statues or busts are to be placed in the new congressional library at Washington, Librarian Spofford has named Fulton and Henry for places inside, and Franklin, Irving, Emerson and Hawthorne for places outside the building. These are the only Americans in the list.

In Cleveland county monazite mining is becoming a paying industry. Recently a representative of an incandescent light company of Gloucester, N. J., purchased ten thousand five hundred pounds, paying six cents per pound. The mineral is recovered from the surface in the beds of streams and washes by the farmers or placer miners in much the same manner as gold and has associated with it in certain localities some gold.

Members of the Delaware legislature are elected in each county on a general ticket, but there is an effort by means of a party arrangement unknown to the law to provide a sort of district representation. Each party assigns a representative or a senator to each hundred, as the township is called in Delaware, but there are more hundreds than the combined number of senators, some hundreds must always go unrepresented.

Herr Van Benthem, a Hollander of distinguished lineage, who for a quarter of a century had lived in seclusion in Kansas, died on a boat in Chicago harbor a few days ago. The dead man was by right a baron of the Netherlands and his sister is Baroness Van Voorst, living at the Hague. His birth gave him a right to the peerage, but by the curious manipulation of titles in the Netherlands he was declared a pretender and came to America, purchasing one thousand acres of land near Sindon, Kan. His wife was with him when he died.

Another tradition has been shattered by the iconoclastic hand of science. The popular impressions concerning the bee

must be revised, says an investigator of the habits of the honey-makers. The bee has long been praised for its industry and diligence, but it has recently been learned that in these respects the bee is a fraud. As a matter of fact, "the little busy bee" works but three hours a day, and is a most thoroughgoing loafer for the rest of the time. Must we give up forever the happy phrase, "the busy bee?" Let us hope that the investigator is mistaken.

Three thousand and six hundred school teachers are employed in Chicago and about four hundred new ones are needed each year. Half of these are selected from among experienced teachers of all parts of the country. The teachers in primary grades receive salaries ranging from five hundred to eight hundred dollars, according to their years of experience; high school teachers from eight hundred and fifty to two thousand dollars. While this is a larger sum than in smaller places it must be remembered that the expense of living is proportionately higher.

Recent reports from Rutland, Vt., contain the information that deer are destroying crops on the farms near that city. Farmer George H. Woodward, of Shrewsbury, six miles distance, has complained to the game league that they have devoured his vegetables. He demands payment for the same. He says they devour his crops during the night and have to be driven off every morning. Within a mile of that city deer are frequently met trotting along the highway. They are docile as dogs. Up in the mountains they feed with the cows. Black bears are almost as numerous as the deer, and quite as venturesome.

ALIENS IN THE NAVY.

An American navy with half of its sailors aliens is an anomaly, and the request of the senate for the birth statistics of the enlisted sea force of the United States evidently foreshadows an attempt to remedy this paradoxical condition. Assistant secretary of the navy, McAdoo discovered some years ago that of the 7,946 enlisted seamen only 3,668 were of American birth. The pay of a sailor on an American ship is now higher than the corresponding figures on any foreign pay rolls, and a chance of receiving commissions similar to the system in the army has been proposed. Naval recruits are no longer so scarce to find among our own citizens. A bill is now pending by which naturalization is to be made possible during active service afloat. The adoption of this measure would prevent injustice to any alien now in the service; but every foreign born sailor who should refuse to become a citizen of the United States should be promptly made to walk the gang plank.

AN ESSAY ON WAIST PLACES.

Apropos of the feminine attire, a charming little blossom of beautiful femininity informed us the other day, rhapsodizes the amorous scribe of a wild west exchange, that gathered waists would be much worn. As a matter of fact this interesting information comes to us like a flash of lightning from a clear sky, for we would have you know, gentle reader, that is our long suit—we mean gathering waists. There isn't more than one man in a hundred who knows how to gather a waist and gather it right. A great many go at it the same as they go to washing sheep or sawing wood, which is indeed intirely wrong. A waist should be gathered, as a general thing, with the right arm, although we are pleased to be able to state that our long practice has enabled us to work with the right or left with equal celerity. It should be handled about as you would a dozen of eggs done up in a funnel shaped paper at a grocery store, until you are sure you have it gathered and well in hand or arm, and then, right then, the amount of firm and steady pressure that a little, frail looking waist will stand is enough to make a man wish for the hugging qualifications of a polar bear. We have been there and know whereof we speak.

A Plow Sulky Humbug.

News and Observer. On yesterday Sheriff Page received a letter from J. J. Vancootz and P. R. Bor derhammer, of High Point, saying that R. J. Finn, J. E. Jones, John F. Ellis and others are selling a sulky plow for \$36 which is no good and which he warns all persons against it. Mr. L. O. Lougee informed a News and Observer man that his brother-in-law, Mr. John Rogers, of Durham county, had bought a sulky plow from these men and that the last he had heard from it it was doing no work, and his belief was that it was a humbug.

Bucklen's Arnica Salve.

The Best Salve in the World for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale at R. Blacknall & Son.

THE WHY OF IT.

SNOW is sometimes of a red color, because of the presence of a minute vegetable cell, the Protococcus nivalis, which secretes a red coloring matter.

A MATCH ignites because of the heat generated by friction. Matches are tipped with phosphorus and sulphur, both highly inflammable substances.

A PLUMB line by the side of a very large building inclines a little from the perpendicular because the weight is attracted by the mass of the edifice.

FLIES can walk on the ceiling because their feet are natural air pumps, and form a vacuum so that the body is supported by atmospheric pressure.

SEA shells murmur because the vibrations of the air, not otherwise observable, are collected in the shell and by its shape are brought to a focus.

A SPOON in a glass filled with hot water prevents the breaking of the glass because the metal readily absorbs a large part of the heat of the water.

MANY springs are intermittent, probably because the channels leading from the reservoirs to the surface are crooked and constitute natural siphons.

IRON rusts more rapidly when wet than when dry because it has, or seems to have, a greater affinity for oxygen when the latter is combined with hydrogen.

A BLACK down grows under the feathers of many birds at the approach of winter because down is the best non-conductor and black the warmest color.

MASTERS IN ART.

ALLORI'S "Judith" is the portrait of his mistress. The head of Holofernes is a portrait of the artist himself.

CARACCI was the father of the pathetic Italian school. The Ecce Homos and Mater Dolorosa date from that time.

HOGARTH was an engraver, and before turning his attention to art, made his living by engraving coats of arms.

GIOTTO was a shepherd boy, and began his artistic career by sketching with a piece of chalk on a piece of slate.

BRENGEL was the first artist to give attention to the different phases of peasant life and represent them on canvas.

LOIRRAINE was left an orphan at the age of twelve, and was cared for by his brother, who instructed him in wood engraving.

BONDONE painted so much after the manner of Titian that many works proved to be his were long credited to the latter.

FRANCA did not begin painting until nearly sixty years of age, and in ten years executed a long series of admirable works.

CRANACH is known as the friend of Luther. Several pictures of the great reformer, painted by this master, are still in existence.

FARM NOTES.

HAVE as many cows as possible fresh in the fall.

ALFALFA growing has proved eminently successful in the dry districts of Australia.

DUCKS fattened on celery possess an exquisite flavor similar to that of the famous canvas back of the epieure.

DON'T cut the new canes back too far. A few inches off the top is enough, according to the number of fruit blossoms.

LONDON milk is dyed cream color to suit popular fancy by mixing one teaspoonful of liquid annatto with eight quarts of milk.

CHICAGO is the great cold-storage depot for eggs. It is calculated that nearly half a million cases are packed away there every year.

BOILED DOWN.

NEARLY every human race have been mound builders at some stage of their history.

THE preparation of the human hair for the market gives employment to seven thousand Parisians.

RESEARCH shows that there is not a particle of vegetation in the eastern part of the North Sea. It is one great watery waste.

THE Dyak head hunting has a religious origin. The Dyak believes that every person he kills in this world will be his slave in the next.

It is often time screws were made by hand, and five minutes were spent in making one. Now a machine rattles out sixty in a minute.

CURIOUS FACTS.

BODIES of moths are covered with a thick down because the insects require protection from the dampness of the night.

THE new Atlantic cable carries 650 pounds of highest-purity copper and 500 pounds of gutta percha insulation to the mile.

WHITE clothing is cool because it reflects the heat of the sun; black clothing is warm because it absorbs both heat and light.

A CATERPILLAR in the course of a month will devour six thousand times its own weight in food. It will take a man three months before he eats an amount of food equal to his own weight.

ABOUT THE WOMEN.

ROSA BONHEUR was a dressmaker's apprentice when she was a girl of fifteen years.

Mrs. JULIA J. IRVINE, the new president of Wellesley college, is a sister of Buffalo Bill.

Miss BALFOUR, sister of the English conservative leader, is now traveling in Africa, and at last advices was the guest of Mr. Cecil Rhodes at Cape Town.

ODETTE TYLER, who was to have been Mrs. Gould, is in Richmond, Va., and will soon sail for Europe. She is writing a novel of Virginia life, entitled "Boss, the Virginian."

The Results From Life Insurance

are more satisfactory for the amounts expended than any other form of investment. For example, read the following letter from a holder of a Tontine Policy in the

Equitable Life

DURHAM, N. C., April 6, 1894. Mr. W. J. RODDEY, Manager, Rock Hill, S. C. Dear Sir:—As holder of maturing Tontine Policy No. 215,008, in the Equitable Life Assurance Society, I beg to express my gratification at the settlement offered. The settlement is liberal and I feel that I owe it to the company to express my gratification at the results attained. Very truly yours, A. J. TOMLINSON.

The Tontine policy represents the highest degree of perfection in life insurance. If you would know how much benefit there is in it for you send us your age and we will send you some interesting figures.

W. J. RODDEY, Manager, Department of Carolinas, ROCK HILL, S. C.

LEGAL AND FINANCIAL

CAUTION All persons are cautioned against purchasing Telephone Instruments requiring battery for their operation, or using instruments of this description except under license of the American Bell Telephone Company, of Boston, Mass.

This company owns letters-patent No. 466,569, granted to Emile Berliner, November 27, 1891, for a combined telegraph and telephone, and controls letters-patent No. 44,291, granted to Thomas A. Edison, May 3, 1892, for a speaking telegraph, which patents cover fundamental inventions and embrace all forms of microphone transmitters and of carbon telephones.

MORTGAGE SALE! By virtue of authority contained in a mortgage deed executed to the undersigned by Alfred Dunningan and Charity Dunningan, his wife, of the State of North Carolina and County of Durham, I will offer for sale to the highest bidder at the court house door in Durham, October 8, 1894, at 12 O'clock M., all that lot of land lying and being in Durham County, State of North Carolina, adjoining the lands of the Shepherd heirs and others, and containing one acre, more or less. For a full description of the same see book No. 17 of mortgages in cases 14 and 15, in the office of the clerk of the Superior Court, at Durham, N. C. This July 4, 1894. P. P. O'BRIEN, Mortgagee. CHARLES E. TURNER, Attorney.

NORTH CAROLINA, Durham County, Superior Court. Saille Wade vs. Wade. Notice. The defendant above named will take notice that an action entitled as above has been commenced in the Superior Court of Durham County by the issuing of summons, which has been returned by the Sheriff of Durham County, endorsed "After due diligence not to be found in Durham County," and thereupon appearing before the Clerk of the Superior Court of Durham County that service of said summons be made by publication once a week for six consecutive weeks in THE DURHAM GLOBE, a newspaper published in Durham, N. C., requiring the said defendant to be and appear at a Superior Court of Durham County, at the County of Durham, at the court house in the City of Durham, on the seventh Monday before the first Monday of January, being the 10th day of January, 1895, to answer or demur to the complaint in the said action. And let the said defendant take further notice that said action is brought for the purpose of dissolving the bonds of matrimony existing between the plaintiff and defendant. This the 11th day of September, A. D. 1894. C. B. GREEN, Clerk Superior Court. Fred A. Greco, Attorney for Plaintiff.

NOTICE! At a special meeting of the board, July 25, it was Resolved, That the board call the special attention of the public to the fact that the ordinance, which will be rigidly enforced from this date.

The co-operation of every good citizen is earnestly requested in the town authorities in enforcing the same.

Chapter 7, book of ordinances, reads as follows: Section 2. Stagnant water, in cellar or other places, shall be removed on notice of chief of police, street commissioner or other officer, and all cleaning shall be done between sunset and sunrise. All persons violating this section shall be fined \$5 for every day it shall remain after such notice.

Sec. 8. All persons having their privies cleaned out within the town limits shall use a disinfectant so as to deodorize the privy, and all cleaning shall be done between sunset and sunrise. All persons violating this section shall be fined \$5.

Sec. 9. No person shall be suffered to carry out of his or her kitchen the dish water or other slops into any of the streets of the town. Any person violating this section shall be fined \$4.

Sec. 18. No occupant of a lot in the town shall allow such lot to remain in such a condition as to hold water until it becomes stagnant, nor allow barrels, tubs or hogsheads to hold water on same until it becomes stagnant. Any person violating this section and failing or refusing to comply, after three days' notice from the chief of police, shall be fined \$5.

Sec. 19. Any occupant of any lot who shall permit persons to make urinary or fecal deposits on same without using lime or some disinfectant as freely, so as to prevent same, shall be fined and pay \$5 for every violation.

Sec. 20. No privy or water closet shall be connected with any street gutter or drain leading into any of the street gutters of the town. Any person violating this section shall be fined \$5 per day for each connection so long as said connection remains.

W. A. WILLIAMS, Chief of Police.
