

be disheartened because our political enemies have control of the government, and feel that our efforts will be of no avail on account of opposition from the party in power. That we shall have this opposition to our advancement, wé have no doubt; but we must not allow that to weigh who, on seeing the immense snake, us down, on the contrary, it should ran and shrieked, one of them crying spur us on to renewed vigor and greater efforts. We should feel now that we are entirely dependent on the snake as it slowly made its way ourselves and that what advance- up the street. The approach of the Thirty-six inch Henrietta, at 271 cents, ment we make in the next four years will be made by our own exertions under adverse circumstances, and if we push forward in the next four and it was soon killed. It proved years to the same degree we have in to be a genuine anaconda, nine feet the past four, it will be of greater glory to us, and at the end of that period we will look back with greater a mystery. It is supposed though pride on what we have done.

The political status of the country at present should not dishearten us -on the contrary it should encourage us to greater deeds, and to more strenuous efforts to keep abreast of our more favored sister States in the and quantity; by increasing our manufactures, and by all means let's buy what we need from North Carolina producers, instead of from Northern and Western markets.

her old position of wealth and influence in the Nation, and when she does, our's will be one of the foremost States of the South. To attain this position all we have to do is to "learn to labor and to wait."

A GIGANTIC scheme has been proposed; by which the canyons of the Rocky Mountains are to be dammed up from the Canadian boundary to Mexico, in order to form vast reservoirs of water to be used in the irrigation of arid lands, and so prevent floods in the Lower Mississippi. Printers and Binders. Figured Canton Flannel for Curtains, at 19 cents, worth 25 cents. Arrive Burkville, Arrive Richmond. floods in the Lower Mississippi. Major Powell, director of the national survey, estimates that at least 150,-000 square miles of land might thus be reclaimed-a territory exceeding in extent one-half of the land now cultivated in the United States. The plan is to build dams across all the canyons in the mountains large Binding, Blank Book Manufacturing, enough and strong enough to hold Records, Ledgers, Day Books, &c. back the floods from heavy rains and Rebinding Old Books, &c. melting snows, and then let the water down as it may be needed upon the Magistrates and County Officers land to be reclaimed. Note the effort at wholesale bribery and corruption contained in the following directions to Indiana Republicans, issued by Treasurer the Dudley: "Divide the floaters into blocks of five, and put a trusted man, with necessary funds, in charge of Send orders to these five, and make him responsible that none get away, and that all vote your ticket." This is the way Harrison won his votes.

From the New York Sun we learn that a veritable anaconda made its appearance in that city a few days ago. It came out of the man hole of a sewer near the corner of First street and Second avenue, just as one of the public schools close by was letting out, and the street was lined with several hundred children, out: "Look out for the crocodile." Their cries brought numerous grown people upon the street, who followed crowd caused his snakeship to stop feet from the ground, when a well directed blow from a club laid it out long and twelve inches in circum-

How this snake got to the city is that it came from some South American vessel unloading at an east river dock, and got into the sewer and by that means reached the place where it came upon the street.

### We Can and do

Guarantee Acker's Blood Elixir for it has onward march. Let us learn to rely more upon ourselves, by increasing our agricultural products in variety whole system and thoroughly builds up the constitution. R. Blacknall & Son.

### **Happiness and Contentment** Cannot go hand in hand if we look on the
