THE

Robert Portner Brewing Company,
 ALEXANDRIA, VA.

Branch - Office - at - Goldsboro, - N. - C.
 F. W. HILKER, MANAGER.

VIENNA CABINET AND TIVOLI

ARE UNQUESTIONABLY THE
FINEST IN THE MARKET!

Consumers are always loud in their praise of its flavor, and many other Brew-ers have tried to impart it to their product, but to no purpose.
 Try it and be convinced.

JAMES MEANS' \$3 & \$4 SHOES
 MADE ALSO IN GERMANY AND AUSTRIA.
JAMES MEANS' \$3 SHOE
 UNEXCELLED IN STYLE UNEQUALLED IN DURABILITY AND PERFECTION OF FIT.
JAMES MEANS' \$4 SHOE
 CANNOT FAIL TO SATISFY THE MOST FASTIDIOUS.
 SEAMLESS \$3 SHOE
 MADE ALSO IN GERMANY AND AUSTRIA.
JAMES MEANS' \$4 SHOE
 CANNOT FAIL TO SATISFY THE MOST FASTIDIOUS.

Such has been the recent progress in our branch of industry that we are now able to affirm that the James Means' \$3 Shoe is in every respect equal to the shoes which only a few years ago were retail at eight or ten dollars. If you will try on a pair you will be convinced that we do not exaggerate. Ours are the original \$3 and \$4 shoes, and those who imitate our system of business are unable to compete with us in quality of factory products. In our lines we are the largest manufacturers in the United States.
 Shoes of our celebrated factory are sold by wide-awake retailers in all parts of the country. We will place them easily within your reach, in any section Territory if you will invest one cent in a postal card and order.
JAMES MEANS & CO., 44 Lincoln St., Boston, Mass.
 FULL LINES OF THIS ABOVE SHOES FOR SALE BY

H. WEIL & BROS.

NEWSY BRIEFS.

The Bellows Falls (Vt.) Times building and a number of stores were burned. Loss \$30,000; partially insured.
The Presbyterian General Assembly (Southern) concluded business at Chattanooga, Tenn., and adjourned.

A BAND of six horse thieves, who stole 500 horses from San Miguel County, New Mexico, were arrested by Sheriff Loper, and 350 of the horses were found in their possession.

THE Rev. H. Greenfield Schorr, aged twenty-nine, the assistant rector of St. Paul's the oldest and most fashionable Episcopal church in Baltimore, Md., has committed suicide. The cause was unrequited love.

PRESIDENT HARRISON, Attorney-General Miller, Private Secretary Halford, General George B. Williams and Representative Anderson, of Kansas, left Washington for a trip down Chesapeake Bay on Mr. Wannamaker's yacht Restless. They spent Sunday in Hampton Roads, off Fortress Monroe.

GENERAL LAW WALLACE and Nathaniel B. Tucker have been appointed Commissioners by President Harrison to go to Haiti and endeavor to secure coaling stations at Mole St. Nicholas and Samana Bay for the United States.

THE marriage of ex-Secretary Bayard to Miss Mary Willing Clymer, is announced to take place on June 19 in St. John's Episcopal Church, Washington.

SEVERAL warehouses in Lubek harbor, Germany, were burned and \$400,000 worth of cotton and flax was destroyed.

POPULAR SCIENCE.

The base of celluloid is common paper.
 Wet compressed gun cotton is the safest high explosive yet produced.

A report from Elba states that the whole of the island is infected with phylloxera.

Lime burners are free from consumption, on account, it is suggested, of breathing dry, hot air.
 Never enter a sick room in a state of perspiration, as the minute you become cold your pores absorb.

A useful piece of apparatus has come into use in Germany in the shape of a traveling electric light.

An exaggerated sense of the danger of falling from high places has lately received the name of "acrophobia."

Experiments made for the French Minister of Agriculture indicate that sugar is a better preservative of meat than salt.

A new bronze, patented by Passed Assistant Engineer John A. Tobin, United States Navy, has lately received very high commendation.

The air of the sick chamber should be kept so fresh that there will be no perceptible difference upon coming into it from the outer air.

It is proposed to bring the waters of Oegern Sec to Christiania, Norway, through an eight-mile-long tunnel through gneiss rock.

It is said that a fatigued eye recovers last the perception of the color by which the fatigue has been induced, and first recovers the sensitiveness of the complementary color.

A complete list of the flora of Newfoundland and Labrador, in preparation by Rev. A. C. Waghorne, will contain about 900 species of flowering plants, about fifty ferns, and over 250 mosses and lichens.

To distinguish cotton from flax, dip the mixture in a boiling solution of caustic potassa, and let it remain for two minutes. The flax will assume a dark yellow color, while the cotton will be a light yellow or nearly white.

A mechanic of Danzig has constructed a hand fog horn that may be heard ten miles. With a second horn of lower pitch to mark the divisions between letters, whole sentences can be clearly transmitted by the Morse or other code of signals.

Dr. Charcot's new treatment of locomotor ataxia, or muscular irregularity, is coming into vogue. It consists in suspending the patient by the arms for a few minutes daily until cured. This, it appears, stimulates the circulation of the blood in the parts affected.

Professor Pickering, of the Harvard College Observatory, estimates that 4000 or 5000 nebulae not yet found by direct observation would be shown in photographs of the entire sky. By photographic aid he has discovered a number of these objects surrounding the great nebula of Orion.

Vesuvius clad in a mantle of Snow.
 Naples, Italy, and the country round about have been treated to a phenomenal meteorological experience. A violent storm of wind, sleet and snow came from the north. Vesuvius was completely wrapped in a mantle of white. The olive and orange orchards of Sorrento were badly damaged. Many olive trees were uprooted or broken off, while the fruit of the trees was blown to the ground in immense quantities. Had the storm come two weeks later the olive crop of the season would have been entirely destroyed, for the trees would then have been in bloom.—San Francisco Chronicle.

His bond is only \$25,000. His father-in-law and his brother, Judge Jessup, are his bondsmen. The capital stock of the bank is \$100,000 and the deposits nearly \$500,000. Mr. Jessup had been cashier and Vice-President of the bank for nearly six years. He is about fifty-five years of age, and is a member of one of the most prominent families in northeastern Pennsylvania, and was an officer in the Second Presbyterian Church. He was also a prominent member of the bicycle club of that city. President of the Pennsylvania State League of American Wheelmen and Vice-President of the National Association. He has two children, girls of twelve and fifteen years respectively.

A noble heart, like the sun, showeth its greatest countenance in its lowest state.

THE GREAT EXHIBITION.

America's Part in the World's Fair at Paris.

The Machinery Palace of the Paris Exposition is the largest building ever constructed under a single roof. A remarkable feature of the building is that the roof has no interior support, except twenty great arches, hinged at the foundation plates and apex so as to provide for expansion and contraction under changes in the temperature. The roof is glazed. The lower panels are decorated with heraldic designs. The ends of the building are filled with toned glass. Light is abundant, and the effect of the decoration is magnificent. The length of the building is nearly 1400 feet, its width 300 feet, and its height 100 feet. The roof extends the entire length on both sides. At the four corners are steam generators for driving the entire machinery. The power is communicated by shafting placed on four rows of trellis girders lying parallel with the length of the building and placed in subways. The engines are now working and there is more power than is required. An idea of the colossal character of the exhibition may be gained from the fact that the power available this year is four times as great as that furnished during the exhibition of 1878.

The American machinery exhibit occupied one-third of the entire space in this building, and is, in all respects but one, more imposing than the exhibit at any previous international exhibition. The exception is in agricultural machinery, in which we do not show progress corresponding to that manifested in other lines. We are, indeed, at a double disadvantage in this, for beside exhibiting nothing notably new, European nations have been successfully overtaking us in the production of our own machines. This is especially true of Great Britain, France, Germany, Austria and Switzerland. In this respect, as in others of equal importance, we have supplied Europe with ideas. It will be remembered that Cyrus McCormick failed to secure in the United States the adoption of his agricultural machinery until after its exhibition in London in 1851. That international exhibition inaugurated a new era in machinery. In 1867 Thomas R. Pickering, engineer and inventor, who has been superintendent of machinery for the United States at the successive exhibitions at Paris, Vienna, Philadelphia, Melbourne and New Orleans, brought about the exhibition of one fifty horse power Corliss engine in this city. This engine was sold to a Frenchman. If no American machinery occupied the space allotted to the United States, the entire area could be filled with the modifications of the Corliss engine manufactured by Europeans. Two-thirds of the steam engines exhibited are of the Corliss type. In 1867 there was an exhibit of machine tools by Brown & Sharp, of Providence. They were all sold. To-day tools made after the Brown & Sharp patterns by Europeans are universal in the exhibition. When the model of the yacht America was shown in the United States it was rather scoffed at. Its superiority was promptly detected by British builders, and it is now being made on the Clyde.

A Baldwin gas engine, built by Otto Bredius, attracts attention by employing gas to run a dynamo for the purpose of lighting by means of incandescent lamps, the claim being that the light thus produced is more economical than gas itself. Warner & Swazey, of Cleveland, and William Sellers & Co., of Philadelphia, are competing by their exhibits of brass-working machinery. "Printing-house Square" in the American exhibit will run with electric power supplied by Pickering for the special accommodation of the presses, which are not easily connected with the shafting. Neither Scott nor Hoe has any exhibit, but the plant, when ready, will be considerable. The Campbell and the Golden Companies' exhibits are the most important. Several typewriting machines are exhibited, including the MacMillan, the Thorne, and Mergenthaler linotype machine. The last named presents the most striking features, as it does away with movable type.

The Edison exhibit occupies one-half the entire American frontage, covering 900 square feet. It is the largest single exhibit in the exposition. It is devised to illustrate in miniature most of the great practical merits of Mr. Edison's inventions. For instance, the lighting of New York city is shown by means of a model in the flooring, with charts and apparatus indicating the distribution of lamps and the control of force. His entire category of inventions, numbering 393, is presented either completely or by intelligent suggestion. It comprises his contributions to telegraphy, electric lighting, system of meters, dynamos, motors, transmission of power, railway electro-motors, telephonic receivers and transmitters, and galvanic and secondary batteries as used in the phonographs and printing machines, the electric pen, typewriter, shafting, the vocal camera and fruit preserving. The phonograph and the American writing machines are the popular delight of the exposition. Among the less imposing, but not less ingenious, machines, which are looked upon as Yankee notions by Europeans, are machines for salting and coloring butter, which is matched by a French machine for desalting and automatic weighing; an automatic American machine for making machinery out of wire; a machine for weaving the covering on rubber hose, and a bonbon machine.

A Scranton (Penn.) Savings Institution Robbed of \$135,000.
 Cashier George Jessup, at the Scranton (Penn.) City Bank, was placed under arrest in the bank after the close of business at that institution. The arrest was made by order of the board of directors. He is charged with embezzling the sum of \$135,000. The directors also decided to close the bank, placing it in the hands of an assignee until its condition could be ascertained.

The announcement of the cashier's arrest created intense excitement in business and banking circles, and especially among depositors, many of whom had made deposits up to the close of business at the bank.

A number of the depositors swarmed around the building decrying the dishonesty which was practiced by the officers of the bank in receiving their money, knowing that the bank was insolvent. Several women depositors, who were frenzied with excitement, fainted upon the street.

The bank had been the depository of the city and school funds, but was not in the municipal officers on April 1 \$186,000 of the funds were withdrawn and deposited elsewhere. The county is caught for upward of \$10,000. The funds of a number of secret and building societies were deposited with the bank, and it is believed the societies will be heavy losers.

The downfall of the cashier is attributed to high living and speculation in unprofitable coal lands.

His bond is only \$25,000. His father-in-law and his brother, Judge Jessup, are his bondsmen. The capital stock of the bank is \$100,000 and the deposits nearly \$500,000. Mr. Jessup had been cashier and Vice-President of the bank for nearly six years. He is about fifty-five years of age, and is a member of one of the most prominent families in northeastern Pennsylvania, and was an officer in the Second Presbyterian Church. He was also a prominent member of the bicycle club of that city. President of the Pennsylvania State League of American Wheelmen and Vice-President of the National Association. He has two children, girls of twelve and fifteen years respectively.

A noble heart, like the sun, showeth its greatest countenance in its lowest state.
