fair in a remarkable degree. Of late there has sprung up in the little kingdom a league composed of semi-mutinous officers of the Greek army. These men demand many needed military reforms, and the single Greek legislative chamber has conformed to their wishes by passing bills to deprive the royal princes of sibly done to facilitate the army reforms demanded by the Hellenic military league. King George has accepted the situation by asking his King upholds much of the program of the league because he considers it good policy to put the army on the best possible footing and in the best possible fighting condition.

poor, suffering women have been led to believe that their misery of mind and body is entirely due to "ills of their sex." Usually the kidneys and bladder are re sponsible or largely so. And in such cases, the kidneys and bladder are the organs, that need and must have attention.
