AGRICULTURAL.

TOPICS OF INTEREST RELATIVE TO FARM AND GARDEN.

Making Clover Hay. Cut the clover as soon as you can see any heads turning brown. Cut at this stage, the clover will make a less weight than if cut later; but it will have a greater food value, a larger part of it being di-gestible. As the heads ripen, the per-centage of woody fibre in the plant steadily increases. Cut as soon as the earliest blossoms begin to turn, it is more roublesome to cure than if cut later; but this is more than compensated for by the in many food combinations, on account of its higher albuminoid ratio. Clover is injured by too much sun. A very hot sun is not desirable, as it "burna" the clover, making the leaves to the Egyptian gardens are the great sheets of rose bougainvilleas that is handling. If allowed to get too ripe before it is cut, or if cut when the dew is of foliage, and which display everywhere The less handling necessary the better. The best weather for clover-hay making is when the sun is not very hot and the air is dry. The worst weather is-unfortunately, not uncommon-hot sun and

pected.

Clover hay will not keep in a stack, unless the stack is protected by better material. In the West, where most of the hay is stacked, this is accomplished by putting timothy on the top. Large barracks—open sheds—are often used. These cost but little, and afford good protection. But nothing else equals a good mow; and nearly all the value of clover hay depends upon its curing and keeping.—American Agriculturist.

Treatment for Young Pigs.

My mode of treatment for young pigs, says a farmer in the Swineherd, is: In the first place after the pigs are farrowed I am very careful to watch them and see that the sow does not overlay them and that their bed is kept clean and dry. I do not feed the sow very much for six or eight days, do not feed any slop until the pigs are five weeks old, then I do not give any sour slop, for it will give the pigs the scours, which will stunt or kill them. I do not allow them to have very much bedding while young, and it should be changed twice a week. As soon as they are old enough to eat corn I sink a trough in the ground so they can get to it easy and feed them soaked corn in it. If I want them for showpigs I give them all the Frenchmen who had been fighting they can eat with a pint of slop to each pig twice a day; if I want them forfall ning to straggle home again, there was a trade, let them run on grass through the restriction of the run on grass through the run on the run summer, and do not feed very much corn, as I think pigs kept in this way will make bigger hogs with better constitutions than when fed too strong while and scientific experts who were standing young, as you are liable to break them on the bank beside a large silken bag, down in the feet and ruin their constitu-tions for breeding purposes, which is one of the main things we are looking after. My observation has been that pigs fed for the show ring never amount to much as breeden; this is not show that case, but you will find it so nine cases crazy fellows named Montgolfier"-had ring nine years and have ruined more an experiment, having good pigs by feeding too young than by disease. The best result I ever had was not to feed any corn till the pigs were four months old, then when I began to feed them it would not be long till they began to curl their tails, and by the time they were six months old they would weigh two hundred to two hundred and fifty pounds; then you are not ashamed for them to be seen. I had thirty male pigs last season that I treated in this way that were hard to beat, and it was no trouble to find sale for them, and every man who got one is well satisfied. Too many get too anxious and feed their pigs to death while young. I know that was the case with me when first started in the business. A new beginner generally thinks he knows more than the man who has been in the business for years, and he finds out when it is too late that he knows nothing about the business and if he had taken some advice he would have been several hundred dollars better off. I use of men who get \$25,000 a year salary, charcoal, sulphur, salt, ashes, and a lit- and the number who get from \$10,000 to

Farm and Garden Notes.

It is often better to hatch the turkey eggs under the ken than under the turkey hen, as the hen turkey is too impatient of confinement and is apt to lead her young ones away at an early age.

Never use sulphur on the bodies of young chicks, for gapes or any other dis-Lard and sulphur applied while in the downy state will cause sores and torture-sometimes death. This we have found true-to our cost.

Blackberry vines should be well cultivated after the fruit has been picked. The old canes should not be cut out until late in the fall, but the new cases, which are to produce next year's crops, will be greatly benefited by cultivation.

Young chickens, as soon as weaned, Lould be provided with suitable perches. Make them low and on a level. be better for their health to get the young fewls off the ground as soon as possible. Do not neglect to provide a door or slide.

In order to have the oxalis flower to perfection during the winter months, they should be so placed as to be fully exposed to the sun as much as possible. They will grow well enough in any light situation, but if flowers are wanted they must be exposed to the sun.

Clover is one of the greatest consumers of lime among farm crops, and this explains the marvelous effect of sulphate of lime or land plaster in making clover catch. On heavy soil a dressing of 100 pounds of gypsum per acre rarely falls to bring good clover.

Be more vigilant than ever during hot weather as to flith and feed. Especially guard against feeding green corn, wheat or any other grain not matured, as in any quantity they will produce cholers or its symptoms much the same as in human beings. Give tonics and keep on hand the Douglas mixture.

The Gardens of Egypt.

At the beginning of March the gardens of Egypt are really wonderful; the orange and lemon trees spread their most pungent odor; the rose trees are covered with innumerable flowers; the palms, with their green and white crowns, swing there in the wind; the oleanders there border the avenues, on the lawns anemones, annual and perpetual flowing pinks, chrysanthe-mums, violets, zinnias, periwinkles, snap-dragons, mignonettes, pansies and pe-tunias blend their innumerable colors with the green ol the trees, bushes and shrubs. Groups of bamboo lift here and there their long green or golden stems, which assume in a few months enormous proportions, the cruelly ingenious punish-ment of the Chinese in binding a criminal greater value of the second crop, whether it is cut for hay or seed. When cut at the right season, and well cured, the nutritive value of clover hay is fully full than the bamboo. One does not equal to that of Timothy, and is greater in many food combinations, on account plant it along the canals and on every cultivated land, where it grows so well before it is cut, or if cut when the dew is of foliage, and which display everywhere on, the effect is of the same nature. It the varied and exquisite tint of their will cure not a little in the cock, and this flowers. The bougainvilleas is certainly curing is more desirable than sundrying. the finest of climbing plants. During The less handling necessary the better. five months it flowers under the winter sun, takes shades of extreme delicacyone might say a light rose trail, the in-tensity of which every play of light varies. The aloes, the agave, attach moist atmosphere; then the hay "burns themselves on rocky slopes. On the out," and sudden showers may be expected.

The alocs, the alocs, the alocs, the slopes. On the banks of the water course the blue lous and the papyrus still review antique remineration. niscences. Grass cannot be raised in Egypt. The layer of soil is so thin that the sun dries it up immediately, and unless the grass is constantly submerged it turns yellow and perishes at once. It is not the heat alone that produces this re-sult, for there is very much fine grass in the tropics; but the heat, accompanied by the shallowness of the soil, renders the culture of grass impossible in Egypt. It is with difficulty that a few isolated blades of grass sprout during winter along the Nile and the canals; they disappear as soon as the spring begins, so that everywhere in the country where ar-tificial cultivation finishes the dry and bare desert begins. In the place of grass a pretty little verbenacea is used, and this is encountered everwhere, the same as grass is encountered in America.

The First Balloon.

This narrow belt of level ground at Avignon between the foot of the wall and the brink of the Rhone witnessed 105 years ago a very strange and memorable spectacle, writes a correspondent of the New York Times. One fine morning in 1782, just about the time when many of the river gate the townspeople came pouring by hundreds and by thousands to crowd around a group of local officials much as breeders; this is not always the were so busy with this bag of silk-"two out of ten. I have been in the show undertaken to send it up into the air as enough to assert the possibility of making similar bags of larger size to navigate the sky just as ships navigate the sea, carrying with them a number of men fully equipped with all necessary stores and implements. The general laugh which greeted the thought of such an extravagant absurdity had scarcely died away when the unbelievers were confounded to see the silken case (which the "two crazy fellows" had fully in-flated by this time) give one final heave and then sail slowly upward into the air, passing over the town at a hight of several hundred feet. The first balloon had been launched into space.

Big Salaries.

There are a score of men in New York who are paid as much for their services each year as the President of the United States. Forty thousand dollars a year is a very tidy salary, There are hundreds tle black antimony mixed together to \$20,000 are legion. Very ordinary men get from \$5,000 to \$8,000 a year, or as much as a Cabinet officer. Dr. Norvin Green, President of the Western Union Telegraph Company, is paid \$50,000, So is Chauncey M. Depew, President of the New York Central Railroad. Richard M. McCurdy, President of the Mutual Life Insurance Company gets a like amount. John Hoey, President of Adams Express Company, fares equally as well. President Henry B. Hyde, of the Equitable Life Insurance Company, is also on the list. George G. Williams, President of the Chemical National Bank, the richest banking institution in America, with nearly \$5,000,000 of surplus, \$20,000,000 average deposits, is paid a salary of \$25,000 yearly. President Potts, of the Park Bank, and President Tappan, of the Gallatin National Bank receive a like sum every twelve months .- Washington

The Naked Truth.

"You have heard the expression-'The naked truth'—and perhaps you do not know how it originated," said the Rev. Sam Jones in his Red Rock sermon yesterday. "I will tell you. Once upon a time Truth and Error went in bathing together. Error came out first, put on Truth's clothes and ran away. Error has been trying to wear the same garments ever since. When Truth came out of the water the only clothing it could find to put on was what belonged to Error, 'Before I will wear such garments as those,' said Truth, 'I will go naked all my life.' Truth has kept its word, and goes through the world naked, without frill or bang, or bustle, or any-thing else,"—St. Paul Globe.

The stimulating power and comfort of sympathy none can express, save he who has realized it. It has a power, like the magnet, asseen but potent, which draws to itself the wandering scattered particles that exist around it.

The Sun's Heat.

At a Royal Institution lecture, Prof. Sir William Thomson expounded the latest dynamical theories regarding the "probable origin, total amount, and possible duration of the sun's heat." During the short 3,000 years or more of which man possesses historic records there was, the learned physicist showed, no trace of variation in solar energy; and there was no distinct evidence of it even, though the earth as a whole, from being nearer the sun, received in January six and one-half per cent, more heat than in July.

than in July.

But in the millions of years which geology carried us back, it might safely be said there must have been great changes. How had the solar fires been sustained during those ages? The scientific answer to this question was the theory of Helmholtz that the sun was a year globe gradually cooling, but as it vast globe gradually cooling, but as it cooled shrinking, and that the shrinking —which has the effect of gravity upon its mass—kept up its temperature. The total of the sur.'s heat was equal to that which would be required to keep up 476,000 millions of millions horse power, or about 78,000 horse power for every square meter—a little more than a square yard; and yet the modern dy-namical theory of heat shows that the sun's mass would require only to fall in or contract thirty-five meters per annum to keep up that tremendous energy. At this rate the solar radius in 2,000 years' time would be about one hundreth per cent less than at preset.

Why He Shot Himself.

The London Telegraph tells the fol-lowing singular story: A tragical sui-cide, which has a touch of romance about it, has just occurred at the prison about it, has just occurred at the prison of Karthause, near Frague. A young soldier named Kazowsky was standing guard there. In his early youth he had lost his father, not through death, but in a far more melancholy way. His father had committed murder, had been pronounced guilty, and condemned to twenty years' hard labor. The young son was then eight years old, and his father's features remained firmly imfather's features remained firmly imprinted upon his memory, as well as the whole painful impression of the event, which produced a severe shock upon his youthful mind.

While standing sentry before the prison of Karthaus, and seeing the conviots led past him on their way to the viets led past him on their way to the open air, he recognized in one of the hoary criminals his own father. He spoke no word, neither did he discover himself to his father; but on being relieved from his post he quietly loaded his gun and discharged a bullet at his head. Dying, he confessed to his comrades the horrible discovery he had made, and which had driven him to seek death at his own hands. seek death at his own hands.

P. T. BARNUM has offered \$20,000 for the capture and delivery to him, or his agent, of the famous sea-serpent of Lake Champlain, dead or alive, provided that the serpent is more than fifty feet long.

Especially to Women.

Especially to Women.

"Swest is revenge, especially to women," said the gifted, but naughty, Lord Byron. Surely he was in bed humor when he wrote such words. But there are complaints that only women suffer, that are carrying numbers of them down to early graves. There is hope for those who suffer, no matter how sorely, or acverely, in Dr. R. V. Pierce's "Favorite Prescription." Safe in its action it is a blessing, especially to women, and to men, too, for when women suffer, the household is askew.

Chatham Co., N. C., has a venerable mule that is known to be fifty-seven years old.

On account of their inability to digest food, will find a most marvelous food and remedy in Scorr's Emulsion of Pure Cod Liver Oil with Hypophosphites. Very palatable and easily digested. Dr. S. W. COHEN, of Waco, Texas, says: "I have used your Emulsion in Infan-tile wasting with good results. It not only restores wasted tissues, but gives strength and increases the appetite. I am glad to use such a reliable article."

The Jubilee editorial in the British London Times was over eleven columns long.

OLD pill boxes are spread over the land by the thousands after having been emptied by suffering humanity. What a mass of sicken-ing, dispasting medicine the poor stomach has to contend with. Too much strong medicine, trickly Ash Bitters is rapidly and surely tak-ing the place of all this class of drugs, and is curing all the ills arising from a disordered condition of the liver, kidneys, stomach and bowels.

The "Y's" is the name of a new society fast preading. "Social purity" is the aim.

An Offensive Breath Is most distressing, not only to the person af, flicted if he have any pride, but to those with whom he comes in contact. It is a delicate matter to speak of, but it has parted not only friends but lovers. Bad breath and catarrh are inseparable. Dr. Sago's Catarrh Remedy cures the worst cases, as thousands can testify.

No investment pays so well as a good educa-tion, as is clearly shown by the record of the Alumniof the Rughy SCHOOL, LOUISVILLE, Ky. it offers the best advantages, and enjoys the highest class of patronage. For fifteen years it has stood with the foremost in preparing boys for college or business life. The terms are reasonable. Send for catalogue to A. L. McDonald, Principal.

The Bluegrass Country.

John H. Jones, Tuttle, Ky., writes: I have been selling medicine for seventeen years, I pronounce Dr. Biggers' Huckleberry Cordial the best I ever sold. It gives joy to every mother. It is a Pleasure,

Writes Mrs. Eliza Ann Smith, of Vermillion, Eric Co., Ohio, to tell the ladies everywhere that nothing surpasses Dr. Harter's Iron Tonic for all tracquiarities. "It cured me when the physicians and all other remedia failed."

Organic weakness or loss of power in either sex, however induced, speedily and permanently cured. Enclose Decents in stamps for book of particulars. World's Dispensary Medical Association, Buffalo, N. Y.

SUPPORTER.

Mrs. Sophita P. Bosweitz, White Cotings O.,
writes: "I took eleven bottles of your Favorite Prescription' and one bottle of your 'Pelieta.' I fim doing my work, and have been for some time. I have had to employ help for about sixteen years before I commenced taking your medicine. I have had to wear a supporter most of the time; this I have had.

Mrs. May Gleason, of Nunica, Ottores Co. Mich., writes: "Your 'Favorite Prescription' has worked wonders in my case.

Again she writes: "Having taken several bottles of the 'Favorite Prescription' I have regained my health wonderfully, to the astonish-and friends. I can now be on my fost all day, a duties of my household. IT WORKS

TREATING THE WRONG DISEASE.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here or there, and in this way they all present slike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct disease, for which he presentes his reliably, they are all only symptoms caused by some womb disorder. The physician, ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Plerco's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery.

alone. I began taking Dr. Pierce's Favorite Prescription and alone. I began taking Dr. Pierce's Favorite Prescription and alone. I began taking Dr. Pierce's Favorite Prescription and alone. I began taking Dr. Pierce's Favorite Prescription and alone. I began taking Dr. Pierce's Favorite Prescription and alone. I was perfectly cured, and have had no trouble since. I wrote a letter to my family paper, briefly mentioning how my health had been restored, and offering to send the full particulars to any one writing me for them, and enclosing a stemped-envelope for reply. I have received over four hundred letters. In reply, I have been for them, and enclosing a stemped-envelope for reply advised them to do likewise. From a great many I have received them to do likewise. From a great many I have received them to do likewise. From a great many I have received them to do likewise. From a great many I have received them to do likewise. From a great many I have received them to do likewise. From a great many I have received second letters of thanks, stating that they had commenced the use of 'Favorite Prescription,' had sent the \$1.50 required for the 'Medical Adviser,' and had applied the local treatment so fully and plainly laid down therein, and were much better already."

JEALOUS

DOCTORS.

A Marvelous Cure.—Mrs. G. F. Spracous, of Crystol, Mich., writes: "I was troubled with formale weakness, leucorrhea and failing of the womb for seven years, so I had to keep my bed womb for seven years, so I had to keep my bed for a good part of the time. I doctored with an army of different physicians, and spent large sums of money, but received no lasting benefit. At last my husband persuaded me to try your medicines, which I was loath to do because I was prejudiced against them, and the doctors tall they would do me no good. I finally told my husband that I he would get me some of your medicines, I would try them against the advice of my physician. He got me six bottles of the 'Discovery,' for ten dollars. I took three bottles of 'Discovery' and four of 'Pavorite Prescription,' and I have been a sound woman for hour years. I then gave the balance of the medicine to my stater, who was troubled in the same way, and she cured herself in a short time. I have not had to take any medicine now for almost four years."

THE OUTGROWTH OF A VAST EXPERIENCE.

The treatment of many thousands of cases of those chronic weaknesses and distressing getton, bloating and cructations of rac.

As a soothing and structure of the mane, at the Invalide Hotel and Surgical Institute, Buffalo, R. Y., has afforded a vast experience in nicely, adapting and thoroughly testing remedies for the cure of woman's peculiar mainties.

Br. Pierce's Favorite Prescription is the custrowth, or result, of this great and valuable experience. Thousands of testimonials, received from patients and training and structure of the womb, it induces the more aggreeated and obstinate cases which had ballied their skill, prove it to be the more aggreeated and continuous wonderful remorp every existed for the relief and cure of suffering women. The relief and cure of suffering women, it is a legitimate medicine, carefully physician, and adapted to woman's delicate in any commanded as a "cure-all," but as a most perfectly specific for woman's peculiar aliments.

As a powerful, invigorating tonic, it is purely vegetable in its acceptance of the womb, respectively and perfectly among the pe
