Mr. Goff said: "Very well, the testimony will be proceeded with at once," and then questioned the commissioner as to the location of the different station ouses in his district.

The commissioner's answers were given after some hesitation and attempts to refer to a small directory, which Mr. Goff objected to. According to Mr. Goff's ecapitulation of Sheehan's answers, the atter failed to correctly locate two of his station houses, as well as police headquarters. "Does your mind get mixed up with the streets of Buffalo and the

streets of New York?" asked Mr. Goff. "No, sir," replied the commissioner. Mr. Goff then elicited from the witness the facts that he had come from Buffalo to this city about eight years ago upon the assurance that he would be given a public position. He denied that he had ever acted as attorney for the Gould estate or that he represented the Gould interest

Questioned about his law practice, Mr. Sheehan said the bulk was in consultation and that he drew a revenue from it of \$4,000 to \$5,000 a year. He said most of his time was spent at headquarters, and although his partner was now in Europe the business did not in any way interfere with his duties as police commissioner. He said he was a member of the contracting firm of John G. Sheehan & Co., composed of John O'Brien and himself. This firm was doing a business in Long Island City, the contracts of which amounted to about \$500.000.

After some sparring between Mr. Goff and the commissioner, with regard to Inspector Williams' connection with the Long Island city contracts, and his efforts to secure a commissionership, an adjournment was taken until to morrow. Commissioner Sheehan did not care about going on the stand to-morrow. He said his business af police headquarters was too pressing. Mr. Goff, however, said the business of the committee was too pressing to excuse him,

An Unknown Vessel Sunk With all on Board.

SOUTHAMPTON, Oct. 25.-The steamer Paris, from New York, which arrived

last night, reports having encountered terrific weather, with mountainous seas, which swept over her deck. On the morning of October 24th at 1:30 o'clock, during the height of the storm she came into collision eighty miles from the Scilly islands with a bark or full rigged ship, the name of which it was impossible to learn. The officers of the Paris believe that the sailing vessel was cut completely in two. The Paris stood by for five hours, until daybreak, with her boats in

readiness to rescue any of the crew of the unfortunate vessel that might be seen, but saw no trace of the ship. The vessel was struck amidships, and it is thought she must have foundered immediately, all bands on board going down with her. The lookout on board the Paris believes the sunken vessel to have been a ship of about 2.500 tons. She was not seen until the Paris was so close to her that it was impossible to avert a col-
