WILMINGTON, N. C.

FRIDAY, FEBRUARY 13, 1897.

TWO GREAT SCHOOLS OF POLITICAL PRACTICE.

Messenger a few days ago gave views of a northern goldbug school to the country. Doctor Bell still adheres to the plan, as to what is to be done with the money.

There is a multitude of financial

political practitioners and advocates at great antagonism and va-

views about the ailment of the

— the cause of the great prob-

and the long continuance of the

The doctors in attendance on

the very languishing patient—or

them, and the most confident

in the cocksure department,

discover the real cause and

the administer in the dark the

physic. The patient, therefore,

is sick, grows weaker daily, and

anger of a sudden and fatal ill-

We have recently seen of the

doctors Dr. Fowler, and also advo-

cator in the north. We find in

work for Dr. Edwards

by opinion by a practitioner of

the school—the old school that has

abdicated for the most part in

England and the Middle states. It

old school of Drs. Washington, Jeffer-

son, Hamilton, Madison, Jackson

and other physicians eminent in

practice. These great doctors are

now with contempt by the

and aggressive school who try

to all the diseases of the body

by administering large doses of

treatment. It lacks thorough

diagnosis, and complete

scientific treatment.

With his feet made it

it is highly advantageous and

to administer from time to time

composition of two singular

important ingredients, and

admirably through more than

years of manhood. The combi-

nation or elixir of life, was made of

equal parts of the oxygen of sil-

ver and the nitrogen of gold—a very

mirable combination indeed but

efficient and healthful to the pa-

tients who trust in golden medi-

cine. The latter-day financial

men in some sections have discarded

the old theory and practice

of great fathers in American med-

icine and entirely the gold treat-

This brings us to consider brief-

Washington and other

He is charged with

to seat the negro Crews from Gran-

ville. They will seat their friends how-

ever clear the case on the other side.

Their party men in congress long ago

set them the disreputable, vicious ex-

ample of seating republicans, and in

some cases where they had been de-

feated by majorities ranging from

900 to 9,000,000. Majorities of the golden

men at the start.

There were some very heroic dis-

plays in the great naval disaster. Men

freely risked their lives to save men

overboard. Admirals Bunker particularly

commends the bravery of a landsman,

William J. Creelman. The admiral

recommends a first-class life-saving's

medal be given to him. He jumped

overboard in the great storm to save

a life.

their own personal paper in 22 per-

cent of their business transaction, we

know there is not money enough in the

country to pay for what is about to

be paid for the canons are down from

£2,000 to £1,000. At Chichester the dean is cut

down from £1,000 to £700, and the

reduction is from £1,600 to £1,220

in the one case and from £900 to £570

in the other. At Norwich there has

been a general reduction of 12 per-

cent.

The treaty with Great Britain has

been amended in important particu-

lars. It offends Cleveland and Lord

Salisbury and will hardly be accepted

if it is adopted, as is reported, by the

House of Commons.

It is grossly unjust and unfair in its

practical operation, to the extent of

the few at the expense of many.

Senator Peffer's entire paper, filling

nearly nine pages in the Forum, is well

worth reading, thinking over, for it con-

tains much that is very suggestive and

instructive. He gives an expression to

one sentiment or view in his concluding

paragraph that seems to us is judicious

and points out a great source of harm

in our country. He writes:

"Hoarding money cannot be made unprofitable men have a right to do what

they please with their money so

as these are the rights of others. But under a system of public banking, charges for the use of money could be

so low, so little, that it would be

more than a trifle to have men

not to have money for that is something

whose proper use is prevented by

the law of God, it is the law of the

country, and it is the law of the state,

and it is the law of the nation, and it is

the law of the world."

One advice is to think of these

things in which concerns a particular

state or territory of the United States

it shall open to the president of the

United States to appoint a judicial

commission of state and territory to be

one of the arbitrators."

The contention is that it is dangerous

and hurtful and the south may be

made to suffer. We do not know how

this is, but the fear is that the repudiated

bonds of the states issued by the

carpet bagger governments may come

back on the people for payment. The

Washington correspondent of The At-

lanta Constitution writes:

"In this case where the question involved

is one which concerns a particular

state or territory of the United States

it shall open to the president of the

United States to appoint a judicial

commission of state and territory to be

one of the arbitrators."

The Christians are said to be the

aggressors in Crete, and the massacres

were under a Greek prince.

Gorman will make a hard fight to re-

store Maryland to the democracy this

year. He will also fight for his own re-

lection to the senate.

McKinley favors a new cabinet officer

for the department of commerce and in-

dustry. More offices, more expendi-

titure, more patronage.

The senate has a leak. All they do

in secret session is reported in news-

papers. Who blabs? Secrets are no

longer secrets. What an age! What a

people!

The mortality in India is on the in-

crease and is greater than it has been in

a hundred years. The famine belt is

400 miles wide and 1,300 miles long,

and the suffering is awful, most dis-

ressing.

A genuine centenarian in Rhode Is-

land, William E. Coake, who passed his

hundredth year a few days ago, says he has

chewed tobacco for 82 years. We knew

in 1864 Mr. Culom of Halifax county,

who told us that he had chewed tobacco

for 80 years. He lived to be considerably more than 90 years.

There were some very heroic dis-

plays in the great naval disaster. Men

freely risked their lives to save men

overboard. Admirals Bunker particularly

commends the bravery of a landsman,

William J. Creelman. The admiral

recommends a first-class life-saving's

medal be given to him. He jumped

overboard in the great storm to save

a life.

The present theory is that gold

is real money, and that everything

that is used as money is and finally
