New York Stock Market.

New York, April 23 .- Undeviating dullness marked the dealings in stocks today from start to finish. The total shares sold amounted to 89,595 and dealers and brokers found their occupation practically gone. Tobacco was the only stock deart in to the extent o. 10,000 shares and that was a selling movement. In the railway list outside the coalers, the only stock which varied its prices to the extent of a point was Burlington and its net change was only half. Such a market offered no inducement except to the strictly professional element and to them only for a very quick turn on an almost infinitesimal margin. DUN & CO.'S REPORT.

The Markets not Effected by the War in Europe-Likelyhood of Greater European Demand for American wheat-Cortinued Heavy Export of Corn-Cotten Eifected only Slightly by the Floods-The Wool and Iron arade.

New York, April 23.-R. G. Dun & Co's weekly review of trade will say: If either Turkey or Greece had been wholly buried in the sea, markets might have been affected less than by the outbreak of war in Europe. Like fire in the heart of a crowded city, it raised the question if a general conflagration may spring out of it. To this possibility, and not to the direct influence of either Turkey or Greece upon the world's money or produce markets, was due the excitement in grain and stocks. As the unknown is magnified, American markets were much more flighty than European, where the possibilities have been discussed and partly discounted for months. But the uncertainty remains and will affect the movement of money and staples until it disappears, creating a large demand for American products at higher prices, causing hasty speculative selling of securities at times, but also more continuous buying by foreign investors, and not improbably influencing the attitude of foreign powers on questions important to this Wheat rose 6 cents from Thursday to Monday and has retained most of the

rise. Since Russia and the Danublan states will be likely to ship wheat scantily, especial needs and much higher prices being possible there. A larger spare of the requirements of western Europe may naturally be drawn from this country and the chance of a war between the great powers has the more influence because the supplies held are not large. While western receipts are not yet on the increase, and in three weeks have been but 5,641,000 bushels against 5,933,199 last year, Atlantic exports begin to gain slightly, amounting to 1.190.329 bushels, flour included, against 1,085,764 last year, and for three weeks have been 3,588,170 bushels, against 3,453,679 last year. But the great increase is still in corn, of which the price has scarcely advanced, though Atlantic bummin' around de country than if I exports were 4,189,146 bushels for the bushels, against 2,624,732 last year. Al- Journal. ready the exports for the crop year have been 33,000,000 bushels larger than Atlantic exports of wheat and flour, and may soon exceed the total exports of wheat and flour from both coasts. Cotton has been affected scarcely any though the government estimates that the flooded districts pielded nearly 500,-000 bales, for increased acreage in other sections is generally reported. The past week, like others of late. has witnessed the starting of operations by several iron works, especially in black sheets for tinning, and yet prices of pig iron and unfinished products are lower, demand not yet equaling the supply.
