> During the month of November, 1878, the members of the Guard, with their own hands, prepared a vault within the monument for the body. An excavation was made in the earth about thirty feet south of the sarcophagus and the body was safely deposited therein and the mouth of the excavation closed.

it was not returned to the sarcopha-

The atmosphere at the point where the excavation was made was almost stifling, and the work was prosecuted at different times during the stillness of night, with no human eye to witness it excepting those who were assisting in the labor of love.

Two days after the funeral of Mrs. Lincoln, in July, 1882, her body was taken by the guard and laid beside that of her husband. The members bound themselves by the solemnity of an oath not to reveal what had been done until the proper time should arrive to do so, and that time has now arrived. Yesterday both bodies were taken by the Lincoln Guard of Honor, in the presence of the Manual Arrive to the presence of the Monument Association, and placed in a new receptacle prepared for them during the week. This receptacle is in the earth, near where the sarcophagus has so long stood. Bacon-hog round......ao It has on the bottom twelve inches of cement, and has double walls of brick. Before being finally entombed, the coffin of Lincoln was opened and the body identified. The hair and whiskers have fallen off and the face is Superfine......a4 oo to strongly resemble that of the

A Corn Sale at Harrisburg.

HARRISBURG, N. C., April 15 .- Mr. M. Stallings, one of Cabarrus county's best farmers, had a public corn sale on last Tuesday for the benefit of those who had to buy corn. But the teacher comforted her : she knew Mary intended no wrong. There was a large boy in the school by the name of John Rollstone. He was rather gifted at writing verses. The whole affair was so funny that he put it into rhyme and this is what he wrote-

" Mary had a little lamb, Its fleece was white as snow,

And every where that Mary went, The lamb was bound to go.

He followed her to school one day, But 'twas against the rule;

It made the children laugh and play, To see a lamb at school, So the teacher turned him out, But still he lingered near

And waited patiently about, Till Mary did appear."

A lady by the name of Hall afterward added other verses to these of Rollstone. The poem became famous. It was read and learned by heart by thousands of children, near and far, who never knew Mary. But the lamb grew up and lived several years. Mr. Richards sheared it every spring, as he did his other sheep. Now Mary's mother knew how to card and spin and knit, as all of our grandmother's did, in those days. So one spring she took the lamb's fleece and carded it, and spun it and kitted a pair of nice, warm, white stockings for Mary.

But the lamb grew old and finally died. Mary shed many bitter tears over it. Her father placed it in a box and buried it in the garden, and at its head he placed a slab of white marble with the simple inscription : MARY's The city authorities have appropri-DEAR LAMB.

Mary grew to womanhood. She had many friends in Boston. A church fair was to be held at the Old South railroad company has agreed to add Church. As everybody had heard the poem about the lamb, some of her friends wrote to her to attend the fair. What do you think she did? She wrapped up one of those stockings and sent it to them, saying : "This was made of the wool of my lamb." When the fair came off Mary was there. Everybody was wild for a piece of the stocking. So they raveled it out and cut the yarn up into yard lengths and tied a card to each piece selves to four or five bashels left their upon which Mary wrote her full name, tracks in the sand.
