Subject : "The Gospel of Health.

TEXT: "Till a dart strike through his liver." -Proverbs, vit., 23.

There is a fashion in sermonics. A com-paratively small part of the Bible is called on for texts. Most of the passages of Scripture, when announced at the opening of sermons, immediately divide themselves into old dis-cussions that we have heard from boyhoo!, and the effect on us is soporific. The auditor guesses at the start just what the preacher guesses at the start just what the preacher will say. There are very important chapters and verses that have never been preached from. Much of my lifetime I am devoting to unlocking these gold chests and blasting open these quarries. We talk about the heart, and sing about the heart, but if you refer to the physical organ that we call the heart, it has not half so much to do with spiritual health or disease moral evaluation spiritual health or disease, moral exaltation or spiritual depression, as the organ to the consideration of which Solomon calls us in the text, when he describes sin progressing "till a dart strike through his liver." Solomon's anatomical and physiologic il discoveries were so very great that he was nearly 3,000 years ahead of the scientists of nearly 3,000 years ahead of the scientists of his day. He, more than 1,000 years before Christ, seemed to know about the circulation of the blood which Harvey discovered 1,613 years after Christ, for when Solomon in Ecclesiastes, describing the human body, speaks of the pitcher at the fountain, he evi-dently meaus the three canais leading from the heart that receive the blood like pitchers. When he speaks in Ecclesiastes of thesilver cord of life, he evidently means the spinal marrow, about which in our day Drs Mayo and Carpenter, and Dalton, and Flint, and Brown-Sequard have experimented. And Solomon recorded in the Bible thousands of years before scientists discovered it, that in his time the spinal cord relaxed in old age, producing the tremors of hand and head;

producing the tremors of hand and head; "Or if the silver cord be loosed." In the text he reveals the fact that he had

studied that largest gland of the human sys-tem, the liver, not by the electric light of the modern dissecting room, but by the dim light of a comparatively dark age, and yet had seen its important function in the God-built castle of the human body, its selecting and secreting power, its curious cells, its elon-cast d homeding these sedences gat d, branching tubes, a divine workman-ship in central, and right, and left lobe, and the hepatic artery through which God con-ducts the crimson tides. Oh, this vital organ

ishable soul. Let all Christian physicians unite with ministers of the Gospel in persuad-ing good people that it is not because God is against them that they sometimes feel de-pressed, but because of their disased body. Another practical use of this subject is for the young. The theory is abroad that they must first sow their wild oats, and afterward Michigan wheat. Let me break the delusion. Wild oats are generally sown in the liver, and they can never be palled up. They so preoccupy that organ that there is no room for the implantation of a righteous crop. You see aged men about us at \$9 erect, agile, splendid, grand old men. How much wild oats did they sow between 18 years and 20! None, absolute none. God does not very often honor with old age those who have in early life sacrificed swine on the altar of the bodily temple. Remember, O, young man, that while in after life and after years of disipation you may perhaps have Leutenant-General P. H. Sheridan has presented his annual report to the Secretary of War. From the report it appears that at the date of the last consolidated returns the army consisted of 2,200 officers, and 24,236 men, consisted of 2,200 officers, and 24,236 men, including Indian scouts. Troops have been continually occupied in patrolling the Oklahoma country, and have been suc-cessful in keeping intruders out of that region. The gradual spread of rail-roads throughout the territory can, how-ever, ultimately have but one effect, and General Sheridan is now of opinion that Congress may well consider the advisability of opening up portions at least, of this coun-try to settlement. In order to quiet the restless young men alter of the bodily temple. Remember, O, young man, that while in after life and after years of dissipation you may perhaps have your heart changed, religion does not change the liver. Trembling and stag-gering along these strets to-day are men, all bent and decayed and pre-maturely old for the reason that they are paying for liens they put upon their physical estate before they were 30. By early dissipa-tion they put on their body a lirst mortgage, and a second mortgage, and a third mot-gage to the devil, and these mortgages are now being foreclosed, and all that remains of their earthly estate the undertaker will soon put out of tight. Many years ago, in fulfillment of my taxt, a dart struck through their liver, and it is there yet. God forgives, but outraged physical law never, never, never. That has a Snai, but no Cal-vary. Solomon in my text knew what he was talking about. He had in early life been a profligate, and he risss up on his throme of worldly splendor to shriek out a warning to all the centuries. David, bad in early life, but good in late. Life, cries out with the an agony of earnestness: "Remember not the sins of my youth." Stophen A. Doug'as gave the name of squatter sovereignty to those who went out west and took possession of lands and held them by right of preoccupation. Let a flock of sins settle on your heart before you get to 25 years of age, and they will in all probability keep posses-ion of it by an in-formal squatter sovereignty. "I prom-ise to pay at the bank \$500 six months from date," says the progressory note. "I promise to pay my life thirty years from ise to pay at the bank \$500 six months from date," says the progressory note. "I promise to pay my life thirty years from date at the bank of the grave." says every infraction of the law of your physical being. In order to quiet the restless young men among the Crow Indians, the report savs, General Ruger has been authorized to enlist about thirty of their number as scouts and take them to Fort Custer. The Crows have always been friendly, and make its boast that they have never killed a white man, and it would be a pity if anything should now oc-cur to disturb the peaceful relations so long standing. General Sheridan is confident that General Ruger will be able to effect a permanent settlement that will be satisfac-tory to the Crows as well as to the Govern-ment.

General Sheridan renews his previous recommendat ons touching the increase of the army by 5,000 men and perfect ng the oranization of the infantry arm by the addition of two majors and two companies to each regiment

General Sheridan says that "the measures which would most promote the efficiency of the service would be the passage of a law authorizing the immediate retirement of those officers, about eighty in number, in whose cases such action has already been recommended by military boards, or who have for frome time been absent on account of sickness from ther commands with but little prospect of ultimate recovery." Attention is called to the needs of the army in the matter of improved small arms, and General Sheridan says: "The Spring-field rifle still remains the weapon of our service, and it is undoubtedly a very good

one. In my opinion, however, the magazine gun must be the arm of the future, and a glance at foreign armies shows that fu-ture, to be very near at hand. Every lead-ing country abroad has either adopted a magazine gun or been actively engaged in experiments looking to the development of an effective system. With us, progress in this direction appears to be very slow, and, as far as I know, no very decided steps have been taken during the year, nor any definite conclusions yet reached."

The report says that the condition of our fences has continued to deteriorate during the year, and that they would be of little real s rvice in time of war.

General Sheridan concludes his report with the following remarks concerning State militia: "I am strongly in favor of the gen-eral Government extending all possible aid to the National Guard of the different States, as they constitute a body of troops that in any great emergency would form an import-ant part of our military force. They should be armed with the best weapons, amply provided with complete camp and gar-rison equipage and instructed in the various drills and exercises according to the tactics and systems followed in the regular army. According to my observation and experience, most of the State troops now march well and handle the gun well, but they are deficient in discipline and in all the duties that teach a soldier to take care of himself while in camp or upon a march. This defect can best be overcome by establishing some system of encampment under the control and direction and at the entire expense of the general Government. In the development of such a measure the entire army, as well as myself personally, will be glad to render such assistance as lies in our power, and I recommend that the favorable consideration of the sub-ject may be commended to Congress."

The German Evangelical Church was organized five years ago, and among the leading members were Peter Brede, E. Schiellin and Martin Bennett, proprietors of big beer gardens where many target companies resort, and other saloou-keepers. The Rev. Mr. Heyser thus explains his action.

Mrs. Lanigan and her twelve-year-old daughter lived in the house while it was be-ing raised. At about ten o'clock a terrible crash was heard. Men and women hastened to the ruins, and led by the agonizing ap-peals for help from Mrs. Lanigan and her child, they began to lift the heavy timbers. A few pails of water extinguished the flames, and after half an hour's work Lizzie was pulled from under a beam, and it was seen that she had been lying on a bed of live coals that had rolled out of the kitchen stove. Hot coals had eaten into the flesh of her legs, exposing the bone, and her face was badly burned. She was sent to the hospital. It is feared that she will die. Dark as Night at 3:30 P. M.

CINCINNATI, Nov. 20.-A strange atmosph c phenomenon occurred at Maysville, Ky., and ic phenomenon occurred at Maysville, Ky., and at Manchester, O., yesterday afternoon. The sun all the morning looked like a ball of fire. At 3:30 P. M. a dense cloud suddenly lowered upon the two towns, and five minutes later it was dark as night. People became frightened and businees was entirely suspended. Many of the superstitious thought the end had come, and began praying. A number of merchants hastened home from their stores. Chickens went to roost and cows went home to be milked. In the midst of the confusion a heavy snow storm set in, and when daylight returned, fifteen minutes later, the ground was white. The same phenomenon occurred at Washington Court House.

Unheard-of Outrage.

ALTOONS, Nov. 20. - When Robert Stiles, a farmer living a few miles from this city, in Logan Township, went out to feed his cattle, he found his fences all down and scattered about his premises, and corneribs and other outhouses overturned and demolished. His threshing machines, ploughs, harrows, and every other implement on his place had been reken into fragments. His cattle and horses had been turned loose and had wandered away. Many valuable fruit trees were girdled in his orchard. What led to the perpetration of the outrage or who was guilty of it, is a mystery, as Farmer Stiles has had no trouble with any one. Not less than \$1,500 worth of his property was destroyed.

Plainfield's Guilty Firebugs. A verdict of guilty was rendered against the Plainfield firebugs, Horce and Lewis Van Nest, at Elizabeth, N. J. While not wholly unexpected, this verdict is generally regarded as a just one. The trial cost the county of Union over \$1,200. Owing to the long time the jury was out, twenty-four hours, a dis-agreement was looked for, and when, at ten o'clock in the morning, the jury sent a mes-sage for Judge McCormick, it was supposed it desired to notify him of a disagreement. Instead the judge was requested to read Coun-cilman Dunham's evidence and Mr. and Mrs. Jackson's, which was damaging to the defend-ants. Soon after a vervict of guilty against both defendants was rendered.

Jacob Sharp's Condition.

Jacob Sharp was said by the warden at Lud-low street jail, New York City, to be still in his usual feeble condition, having to be lifted out of bed daily to his armchair, in which he lies apparently dozing and seemingly uncon-scious of everything that goes on around him. He is rarely up more than two or three hours at a time, and some days does not dress at all. In his brighter moments his wife, who is constantly by his side, reads to him, and his food, which consists mainly of oatmeal porridge and milk, is prepared by her own hands. He manifests no interent in his case, and sees

They were startled by a sulden explosion, some fifteen or twenty feet away on the other side of the boiler. It made a terrible noise and was heard in many parts of the city. The bomb which was picked up was made of inch and a haif gas-pipe, about two feet long. One end was still in tact, plugged up with a cap and a hole in the pipe near it for a fuse. The pipe was split in several places. Fortunately the explosion was all in one direction—away from the men. The flooring and parts of the building were set on fire, but speedily extinguished by men. No other damage was done. It is a miracle that there was not a great it so of life. It is supposed the bomb was thrown in the open window. The works before had no troube at all with their men, but have been running a double force for nine months.
