We may not by this proposed association be able, nor do we care, to limit the production of the soil, for this will depend more or advice of his physician. Arrangements have less on good and bad seasons; but we have the power and control of our shipments, and thus regulate the supply of our commodities offering in the public markets of the coun-try, and this will always insure us fair prices. The farmers of this country cannot compete with In lia wheat in the Liverpool market, nor do we intend to longer submit to the payment of the cost of taking our wheat to Liverpool before it can be sold in our home market. What we want is a fair exchan of products. This we demand and wall submit to nothing less: We have the power, and all that is needed is organization to make this power effective. If we can by this proposed organization control our ship ment of these commonities and prevent the supply from exceeding the demand in this market, then we would unquestionably be come masters of the situation. The plan contemplates, first the establish ment of ten central agencies, to wit: Chicago Cincinnati, Kansas City, Indianapolis, Omaha, St. Louis Cedar Rapids, St. Paul, Milwaukee and Louisville, these agencies to do all the selling for the members of the as sociation, for which they shall be paid stated salaries, second, the territory tributary to these commercial points to be divided into eight principal districts and subdivided into sub-districts by counties; third, the principal of each central agency, together with a gen eral superintendent of the association to b ed, shall constitute an executive board, with power to regulate and control shipments of produce upon the markets, and to do any and all things that shall in their judgment appear to be to the best interest of the association.
