

**NOT RESPONSIBLE.****College Girl Who Robbed Students Declared Insane—Her Life Exemplary and Her Class Standing High.**

Northampton, Mass., June 9.—Two prominent physicians in this section of the State have reported that Miss Mabel L. Burt, of Bridgeton, N. J., a former Smith College student, who is under arrest in the county jail on the charge of larceny of money, watches, and jewelry to the amount of \$5,000 in the room of the students of Smith College, is suffering from mental derangement, and should receive treatment. Dr. Mary Brewster, physician at Smith College, visited the girl last night and again today, and she reported finding her in such a condition mentally that she expressed a desire that Dr. Hansen, the woman physician at the State Insane Asylum, be called into the case.

Dr. Hansen, after making a careful investigation expressed the opinion that the girl is suffering from mental derangement and should receive immediate treatment.

Mr. Bert spoke tonight of the nervous and impulsive character of his daughter, and said she could not be in her right mind and commit the crime she is accused of. He said her life had been an exemplary one while at home. She was a bright scholar, and was valedictorian of her class when she graduated from the high school.

One of the physicians who saw Miss Burt today expressed the opinion that her nerves had been unstrung to such a degree that it had affected her mind to the extent that she had lost control of her actions at times. The statements of experts will be certified to before Judge Bassett, of the Probate Court, and then submitted to the grand jury, which meets tomorrow.

Mr. and Mrs. Burt spent several hours today with their daughter in the Hampshire County jail.

**Headless Body of Woman.**

Lowell, Mass., June 10.—The headless and decomposed body of a young woman was found under a heap of brush in a patch of woodland in Chelmsford this afternoon. Murder had been committed in a horrible fashion, for the head had been separated from the trunk by a series of slashes with a dull weapon.

The meager clothing afforded no clue to the identity of the unfortunate, and the circumstances offer a case of interest outside rather than in the direct community, as the theory quickly set up is that the body had been taken into the woods and thrown in a spot that offered some seclusion.

A physician, on viewing the body, thought it had lain in the place where it was found for four or five weeks. To morrow the entire neighborhood will be looked over, in hope of finding the woman's head. Whether or not there were body wounds remains to be shown by examination. An abrasion near the heart may have been fatal. One of the men who assisted in removing the body concluded that it was from a bullet.

The police know of no missing woman in Lowell or neighboring towns.

**Bank's Stolen Gold Recovered.**

Mineral Point, Wis., June 10.—Thirteen thousand dollars more of the gold coin stolen from the First National Bank of this place on May 24 has been recovered. It was found in the vault of an out house of the City Hotel, about a block from the looted bank, at which the prisoner, Steward Jelleff, boarded.

It is believed that the detectives obtained information as to the hiding place of the coin from the prisoner, one containing \$9,000 and the other containing \$1,000 each. This find and the \$8,000 previously recovered, comprises all the gold missing from the bank. The balance, \$5,000, is in currency and the detectives hope to recover it later.

**A Nation of Farmers.**

Philadelphia Record.

Still we are a nation of farmers. Incomplete census returns show that in 1900 there were 5,700,000 farms under cultivation as compared with 4,564,691 in 1890. This may be deemed a remarkable increase, showing that the growth of our industries in symmetrical, the farmers keep pace in the march forward. The single discouraging feature of the situation is the increase of tenant farming. This is accounted for, however, to some extent by the lease of lands by immigrants who are intending purchasers. As the area of unoccupied arable adds wkwkw area of unoccupied arable lands in the United States becomes less and less it is altogether probably that future censuses of the country will show a comparative decline in the number of farms.

**FALSE REPORT.**

It has been reported over town that we are going to leave Greensboro. We desire to impress on the minds of one and all the fact that we are not going to move from the city, but have moved to rooms over J. M. Hendrix & Co's. store, 225 South Elm street and will devote our entire time to the eye and proper correction of all optical defects. We are better prepared than ever to give strictly first class services to all having eye troubles, or headache due to refractive errors.

Respectfully,

DRS. R. L. MOORE & R. W. WOODWARD.  
Successors to Drs. R. L. and E. H. Moore.

**CANCER**

The diseases most feared are those which are inherited—handed down from generation to generation, and family to family. By far the most destructive of these is Cancer, which finds the greatest number of its victims among the children and grand-children of those whose blood was tainted with this dreadful malady. You may carry this poison in the blood for years, but as the vital powers begin to wane a slight bruise or cut, wart or mole, sore or pimple may develop into Cancer. From middle life to old age is the time when the slumbering poison is most apt to break out, a sore or ulcer often degenerating into Cancer, and Tumors become more progressive and ulcerate through the skin, the sharp, shooting pains causing the most intense suffering.

The Cancer patient naturally grows despondent as one after another the usual remedies fail, and the sore shows no sign of healing. The impurities that have been accumulating in the system, perhaps for generations, cannot be eliminated nor the poisoned blood made pure by salves, washes and plasters. The proper treatment is to purify and build up the blood, remove the cause, when the sore or ulcer heals.

S. S. S. goes directly into the blood, destroys the virus, stops the formation of Cancerous cells and cleanses the system of impurities. What we say of S. S. S. as a cure for Cancer is supported by the testimony of those who have tested it and been restored to health.

Begin in time, don't wait until the blood is so polluted and the system so thoroughly saturated with the poison that no medicine, however efficacious, can check the progress of the disease. If there is a taint in your blood get it out at once, don't wait for some external evidence of it, the appearance of a tumor or ulcer. We have prepared a special book on Cancer which we will mail free. Our physicians are ready to help you by their advice and such direction as your case requires. Write us fully and freely—no charge for medical advice. **THE SWIFT SPECIFIC CO., ATLANTA, GA.**
