SHELLS CUT THROUGH WIRE

New Projectile Has Scissors Attachment—Another Releases Short Chains When It Explodes.

There seems no limit to what the new shells can do. One of the latest shells has a sort of scissors attachment which, when released by the explosion, will cut through the strongest wire entanglements. Another releases a number of short chains when it explodes. These chains are sure to wreck anything they touch, says Popular Science Monthly.

The scissors shell has an opening in the casing through which the cutting arms project. They are slightly recessed in order to avoid wind resistance. The arms are attached near the nose of the projectile. They are mounted on steel studs in such a manner that they can rock and expand in order to throw the free ends outward at the base of the shell.

The fuse is made in the ordinary way, and behind it is a chamber for the explosive charge. The projectile is fired just as any shell is fired. The explosion releases the cutting arms and they cut through any object with devastating force.

The chain shell is considered similarly, except that the short chains are wound around the gaine and separated by disks which keep them in place until the projectile is emptied. Sometimes the chains are weighed heavily at the ends. When the explosion takes place the chains fly out with fearful force, and in addition to their high-speed forward movement they rotate rapidly. Needless to say, where they hit something, there is nothing left.

Explaining the Ceremony.

It is from the Boston Traveler, and is supposed to have been spoken by a clergyman's small son, whose older brother was to be confirmed at church. "It's like this," quoth the youngster, "the bishop is going to put his mits on brother's bean."

Couldn't Take Any Chances.

"What are you doing with the lady's slipper in your pocket? Looking for a Cinderella?" "Naw; my wife wanted some stockings to match. I couldn't cut a section out of the slipper, so I had to bring the pesky thing along."

Compliment?

"J. Fuller Gloom passed a pleasant compliment on my distinguished ancestor, Alfred Tennyson, the other day," confessed Tennyson J. Duft. "When I casually mentioned that I am a descendant of Lord Tennyson he cried out, quite emphatically, 'Good Lord!'"

"FANTOMAS" WALTER RUTT

On a certain sector in France the Pollus were menaced by "Fantomas," the "ghost" aviator, who, though he swept down close to the lines, seemed to have a charm against the bullets of the soldiers. After more than a year of adventurous attacks he has been brought down and identified as Walter Rutt, the world's greatest bicyclist, who was well known to patrons of the six-day bicycle races at Madison Square Garden, New York. He left the United States for Germany on the outbreak of the war.

She Wished Good Service.

Telephone girls have many questions put to them daily, according to a young woman who is employed at the Central Union exchange in this city, notes the Indianapolis News.

But the funniest request made by any of our subscribers in all my experience," she continued, "came from an old woman just the other day. 'Is this the Bell Telephone company?' she asked.

"Yes, ma'am," I replied. "Well, I want to speak to Mr. Bell at once. There's something the matter with my telephone, an' I want him to come down here an' fix it."

Effect of Learning.

President George Kistner of Campbell college said the other day: "Learning, profound learning, is the light of the world, but we continually get new proof of the harm a little learning does."

"A lady employed a schoolgirl of twelve to scrub her front steps. The schoolgirl worked well, but suddenly she stopped coming. The lady met her on the street and said:

"What's the matter, Minnie? Why have you stopped working for me?" "The urchin tossed her head. "I'm takin' Latin now," she sniffed, "and I don't scrub steps no more."

Wrist Watch Again.

Old Convert—I can't understand why the wrist watch is such an object of levity. I'm sure it is a great convenience.

New Convert—Yes. With the old kind, in order to find out the time I had to unbutton my coat and fish around in my waistcoat pocket for my watch. Now all I have to do is unbutton my coat, fish around in my waistcoat pocket, discover that my watch isn't there, and then pull up my sleeve and look at my wrist watch.
