## Health Officer Does Little of Everything

"The above report does not include a thousand and one inquiries and requests ranging from the moving of a dead cat from in front of some one's house to the prevention of train whistles blowing as they pass through town at night, disturbing the quietude, health and happiness of the slumberer."

So comments Dr. W. A. McPhaul, county health officer of Robeson county, in submitting a report of the health work in that county for the six months ending June 30. Yet included in his

report is the record of sufficient activities to have kept him a mighty busy man for the entire period.

Notable in the record of the half year is work of the life extension unit in which 870 grown persons have made application, and 648 have been physically examined.

In this work very careful physical examinations are given for the purpose of discovering any of the minor defects that so often give rise to serious troubles when allowed to go without attention. The work is along the same line as that of the leading insurance companies of the countries, and it has been estimated that it is the means of adding at least ten years to the average life.

Hardly second in importance has

been the educational work done by Dr. McPhaul during this period. In public schools, he has held 49 meetings, with an attendance of 4,424, and 17 meetings in other places with an attendance of 1,858, making a total of 5,082 people reaching in this summer. In addition he has written 1,881 letters—secured the publication of 93 newspaper articles and distributed over 12,000 pieces of health literature.

That the health work that has been so intensely conducted in Robeson county has been most beneficial is shown in the report of the quarantine unit, which disclose a very small number of contagious and infectious diseases, the following figures being given: whooping cough, 101; measles, 51; diphtheria, 15; scarlet fever, 0; typhoid fever, 15; smallpox, 42; infantile paralysis, 0; epidemic meningitis, 1. There were 53 schools visited, 9,440 examination cards received, 751 children examined and 23 treated for defects discovered.

In addition to these regular duties Dr. McPhaul lists a number of visits to the county home, the jail and county convict camps, conferences with civic authorities, examinations for commitment to the insane asylum, lectures to midwives, sanitary ordinances secured from town governments, post mortem examinations, and "the thousand and one" other things that a live health officer is called upon to do.

## She Had Struggled for 23 Long Years

Mrs. Linda Bech Says She Was Physical Wreck — Takes Tanlac and Troubles Have Entirely Disappeared.

"I have actually gained sixteen lbs. on two bottles of Tanlac and am able to cook for a whole house full of people," said Mrs. Linda Bech, residing at 165 Echols Avenue, Atlanta, Ga.

"For twenty-three long years, I have struggled with nervous indigestion and never found any medicine that did me any good until I started taking Tanlac," she continued. "Everything I tried to eat hurt me, and I could eat no meat or vegetables at all. The pressure from was that arose on my stomach, almost smothered me to death. I'd gasp for breath, and my folks would have to rub me and work with me until I could get back my speech. I suffered with pains in my shoulders and limbs and back, and would get so weak that I'd have to lay down four or five times a day and could do none of my work at all.

"After spending lots of money for other medicines without getting any relief, I decided to try Tanlac and I began to pick up as soon as I started tak-

ing it. I am eating just anything I want now and I haven't had a smothering spell since I took my first bottle. I am not nervous anymore, I sleep fine every night and every sign of my old troubles has gone entirely. I am glad to recommend Tanlac."

Tanlac is sold in Greenville by Warren Drug Co.

## Rats and Huns Both are Enemy Objects

WASHINGTON. — A nation-wide offensive against the American rat, house, barn, corn-bin, water-front and other varieties, is under way. Its not so much a personal matter; but that he is destroying some two hundred million dollars annually in foodstuffs and property, not to mention the labor lost in replacing the wastage.

Already Mississippi, West Virginia, Georgia, Maryland, Minnesota and Alabama, backed by aid of United States government experts, are aligned in the fight; and pressure is under way to make the move national as a war measure.

Anti-rat literature may be had free from the Agricultural department.

### NOTICE

This is to give notice that I, J. B. Kittrell, being in the United States Army, have this day sold my brokerage business known as "J. B. KITTRELL, Broker," to Lean Kittrell, Jr., and that after the statutory period of 30 days from date I will not be responsible for any debts or obligations incurred by said business.

This July 8, 1918.  
(Signed) J. B. KITTRELL.
