Grandmothers Vindicated

Our grandmothers used to bang a red flannel petticoat over the window of a smallpox patient's room, asserting that it hastened the cure, and also prevented "pitting." Scientists have now discovered that the red rays do actually exert a bad effect on the bacteria of the disease, and a correspondingly good effect on the patient.

Did you hear about? Have you read about it? Have you seen it? Daily circulation over 2,500. More than double any other paper in Pitt county. Advertise in the Daily News for results. Ollie Clark, Adv. Mgr.

J. T. May and wife to W. A. Hudson, consideration \$16,344. R. R. Fleming to J. B. Johnston, consideration \$8900.

DATE THERE, THOUGH HIDDEN

Information on Peace Tower Erected in Canada Would Puzzle Average Man to Find.

Back to the earliest times when man erected public or memorial buildings is said to run the practice of recording the date so that it remains hidden from casual view, in an ornament of inscription, and can only be read by careful study. Why the practice started it is now impossible to say; it looks almost like a playfulness on the part of the first builders, but it has continued down the ages, and its latest example occurs in the great peace tower of the government buildings in Ottawa. Here one reads the inscription:

This Stone was laid by Edward, Prince of Wales, September 1. In this Year of Victory. Finis Coronat Opus.

The hypothetical stranger from Mars might reasonably ask when was the Year of Victory; and if he examined the inscription, closely he might discover that certain letters, beginning with the first "4," are distinguished from the rest by having an indentation under them, and that adding these letters together answered his question in Roman numerals. Most of us, perhaps, would have to take the dictionary to help us translate them, but none the less ILDDDDCLHVICV means 1919.—Christian Science Monitor.
