FINISH ELECTRIC RATES THIS WEEK

Power and Light Company and the Tidewater Power Company. The commission is in favor of an agreement with the Southern Public Utilities than either of the others. It was intimated today. The first offer made by this company, with the provision that the old rates could be restored on 60 days notice if the revenue from the new rates proved to be insufficient, was rejected by the commission. It is understood. The company then submitted another offer, embracing a much greater reduction in rates, and with a revised provision that these rates should remain in effect for nine months. If the revenue was not sufficient at that time under the lower rates, it asked permission to give 90 days notice on a petition for higher rates. This assures the people of a minimum of one year under the lower rates. Because these rates embrace such a substantial reduction and assure the company subscribers of at least a year's service at these rates, the com-

mission is very much inclined to accept the proposal, it was indicated. For even if the company does ask to increase its rates at the end of a year's trial, it cannot actually make the increase until its case is heard by the Corporation Commission and permission to do so granted. The rate reduction proposed submitted by the Carolina Power and Light Company is not yet regarded as quite satisfactory, it was learned. But the members of the commission are inclined that the few remaining kinks in this proposal can be ironed out within a few days. The new rate order for this company will probably be issued by the end of this week. The order affecting the Tidewater Power Company is expected to be the last.
