IN COUNTY JAILS

Highways Do Not Take

Them Over and Counties

Must Support Them

Daily Dispatch Bureau, In the Sir Walter Hotel. PV J. C. BASKERVILL.

Raleigh, June 1-Since the State

Highway Commission has started tak

ing over all the 30 day prisoners in

accordance with the law passed by

the 1933 General Assembly, women

prisoners have composed a large part

of the population left in the various

county jails over the State, according

to Dr. R. Eugene Brown, director

of institutions for the State Board of

Charities and Public Welfare. Only

the male prisoners are sent to the

highway prison camps, where they

are worked on the roads, with the re-

sult that the women prisoners must

be left to serve their sentences in the

Reports last month from 34 county

jails and si xcounty prisons indicated

a total of 255 women prisoners serv-

ingv sentences in these jails and pris-

ons, according to Brown. This

would indicate that for the State as

a whole at least 500 women are serv-

county jails.

noon

Ten

attend

of the

ing trial, 108 were white women and 147 colored. Most of the male prisoners now in county jails are being held there either awaiting trial or on appeals since all those sentenced for 30 days or more are sent immediately to the highway prison camps. A total of 583 male prisoners were reported as being in the 40 county jails and prisons that reported last month to the Welfare Department. Most of these women prisoners-a

majority of them serving terms for prostitution-are being kept in most of the jails in complete idleness, according to Brown, with the result that most of them will be just as bad if not worse when released.

"These women prisoners should be sent to the Farm Colony for Women. where they could be put to work and kept busy," Brown said. "But the capacity of the farm colony is for only about 50 women and it is kept filled all the time. The result is that there is nothing to do with these women

prisoners except to keep them in the county jails."

BEER DEALERS TO RF FAFD UNV

Maxwell Orders Clo Watch for Evaders of State's Tax Levies

Daily Dispatch Burean, In the Sir Walter Hotel. BY J. C. BASKERVILL.

Raleigh, June 1.-Orders to watch beer dealers more closely than ever to see that they do not buy from beer bootleggers oin order to avoid paying the state tatx of \$3 a barrel and onle cent a bottle, were issued today to all deputy revenue commissioners and license inspctors of the State Department of Revenue by Commissioner of Revenue A. J. Maxwell. He particularly urged all deputies and inspectors to see to it that all retail beer dealers buy their beer only from regularly licensed distributors, who in turn pay the tax to the State.

"With the large quantaties of been being shipped into the State by truck. retail dealers will, of course, have opportunity to violate their agreement to buy only from licensed distributors and make occasional purchases of beer from unlicensed distributors shipping beer into the State by truck' Maxwell said in the memorandum jus issued to inspectors.

"The State Highway Patrol is keep ing a close watch on all trucks bringing beer into the State but it is impossible for it to check up on all of

The new beer law passed by the 1933 General Assembly in Section 19 provides that all the beer retailers must either agree to buy their beer only from dicensed istributors or else post a heavy bond. Almost all of the retail dealers have hence agreed to this provision especially since the state tax is paid by the licensed distributors.

Commissioner Maxwell said the purpose of his memorandum was to ask all the field force to keep a vary close watch on all places selling beer with a view to promptly prosecuting any retail dealer found violating his agreement and the immediate revocation of his license. "In order to assure the proper observance of this law it will be necessary to enforce its provisions strictly' the memorandum said. "If in any case licensed retailer, you are hereby instructed to proceed with the prose cution of any such person.

TOMORROW you will have a chance to test for yourself a new motor fuel development perfected and endorsed by the world's largest oil organization

No doubt you are tired of the "Super" claims that are making gasoline advertising so hard to believe. Exaggerated descriptions of quick-starting, antiknock, power, pick-up, economy • The Standard Oil Company of New Jersey makes no claims for Essolene. We merely state that we have spent millions to make a bet-

ter fuel at regular price than has yet been made for the modern motor. We stand squarely back of Essolene as such a fuel. We make this statement with full knowledge of our responsibility to the public, as the leader in the oil industry • Try Essolene tomorrow. It will speak for itself-and you can furnish your own superlatives • Essolene will be sold at all Esso Stations.

Colored Orange to Prevent Substitution

GASOLINE PRICE

AGAINST HOUSE F

Very Dangerous As Well As Annoying And Are Menace to the Health

Raleigh, June 1.-Flies are very dan gerous as well as annoying. Typhoid, dysentery, enterities (inflamation of the intestine), infantile diarrhea, tuberculosis, small pox, eggs of parasitic worms, etc., are spread by flies. "The presence of flies is an indication of uncleanliness, unsanitary surroundings, and improper disposal of substances in which they breed." says C. H. Brannon, extension entomologist at State College, "and the importance of concerted, organized effort on the part of whole commun-

ities, not only cities and towns but ruarl neighborhoods as well, cannot be over-emphasized."

By the most painstaking care, one may prevent all fly breeding on his premises, but it will give little results If his neighbors are careless. A great many people suffer fro mthe neglect of others and some sort of cooperation is necessary.

The true house fly laws its eggs in horse manure (preferably), human excrement, hog manure, chicken dung, and to some extent in cow manure. Eggs are also laid o na great variety of decaying vegetable and animal matter. Sanitary surroundings and proper screens should be given close attention if house flies are to be controlled

The size of mesh in window screens and mosquito bars is very important. Eighteen meshes to the inch is the correct mesh and should be obtained by those who expect to keep out mosquitoes. Sixteen meshes to the inch will be effective if a heavy grade screen is used. Fourteen meshes to the inch will keep out flies but will not keep mosquitoes out. Copper screen cloth is cheapest in the long run as it lasts for years.
