No Fire Loss In The Month of May

A perfect record with no fire loss at all was made by Henderson during the month of May, Fire Chief E. T. Shepherd reported today. There were only two calls to the firemen during the month. One of these was the result of a short circuit in an automobile, in which the loss was too insignificant to record. The other was the destruction of a residence in one of the colored sections of the city, but was outside the city limits and thus does not go on the record as chargeable to Henderson's fire record.

All Pupils Making Up Units Asked To Report For Work at 9 a. m.

Announcement was made today by Professor W. D. Payne, principal of the Henderson high school, that the summer school to be conducted there during the summer would open next Monday, and pupils who have work to get off to assure their promotion to the next grade in the fall are advise? to report at 9 a m. Monday at the high school.

Prof. Payne sad the staff for the summer school had been completed, and will be composed of Mrs. W. M. Weir, for English; Miss Julia Bthea. foreign languages; Professor Crowder for science and Professor Payne for mathematics.

All pupils who are in any way incrested in the summer school courses are advised to leave their names immediately at the office at the high school, to the end that the classes may be arranged for the greatest convenience of those who will attend. There s no obligation on the part of the pupil to attend the summer school, Prof. Payne said, the matter being entirely optional. But it is very important that all pupils considering the summer school work should report immediately.

The classes will be conducted for pupils desiring to remove a condition. Pupils may remove a condition on one semester's work by attending classes one hour per day for six weeks, or on two semesters of work by attending classes for two hours a day for six weeks. This summer for the first ime any pupil may take new work in the summer school on the following basis: Three hours per day for eight weeks, or four hours per day for six weeks. Either plan will enable the pupil to receive credit for one full unit

Any pupil who is weak in a particular subject will find the summer school plan an excellent way to remove these breured subjects, Prof. Payne stated. It will also enable the pupils to broaden his high school training by taking more subjects, and thus better preparing himself for college work later.
