RUSH AGREEMENTS ON TO EMPLOYERS

Post Office Department Hurries Blanks; Meanwhile Hugh Johnson Opens Hearings on Code for Oil Industry, Which He Calls One of Most Difficult

Washington, July 24.—(AP)—President Roosevelt primed himself today for the supreme endeavor on behalf of his recovery program, scheduled in the address to the nation this evening.

Those in touch with him were impressed by the importance he attached to the occasion, coming as it does upon the inauguration of the intense national campaign to put more money into the pockets of the needy so they can buy.

As to exactly what he plans to say, however, there was no assuredly accurate telling. Some persons in close contact with him spoke as freely of their not knowing his intention, as they did of their knowledge that he deemed the speech of dominate nature.

The Post Office Department, meantime, hurried the dispatching to five million employers the "partnership" agreement with the government designed for them to raise wages and restrict working hours, thereby help.

LONDON PARLEY IS MERELY A STARTER

That's Hull's View of It, Rather Than That It Has Failed; Pittman Expects Full Agreement by Eight Powers This Week On His Silver Proposal

London, July 24.—(AP)—Far from dead, the world economic conference may live many years as a result of today's decision by the steering committee to remain in permanent session here, although the conference will take a recess on Thursday.

Prime Minister Ramsay MacDonald insisted that this action be taken. Behind him was the full support of Secretary of State Cordell Hull.

Mr. Hull looks upon the conference not as having failed, but as a series of conferences of which the London parley is only the starter. Today's decision calls for the original members of the steering committee to attend meetings, and James M. Cox will be able to represent the United States, as he will stay here several weeks after the recess starts.

The nations whose delegates on the steering committee will not be in London will be represented by their ambassadors here.

Senator Key Pittman expects five great silver producing nations to agree this week on their purchase quotas of the metal, thereby completing his eight power arrangement to stabilize silver in relation to gold.

Under the pact, the United States, Mexico, Canada, Peru and Australia agree to withdraw 140,000,000 ounces of silver from the market in the next four months, while India, China and Spain, the chief holding countries, promised to restrict sales.

Requests For Roads Are Made

Jeffress Tells Applicants To Be As Spring As Possible In Demands

Daily Dispatch Bureau, In the Sir Walter Hotel, BY J. C. BASKERVILLE.

Raleigh, July 24.—A public meeting of the new State Highway and Public Works Commission was held here today in the hall of the House of Representatives to hear a number of delegations with regard to requests for roads. The meeting started at 11 o'clock this morning and from the number of delegations that wished to be heard, indications were that it would last all day.

Only delegations from counties were heard today, and Chairman Jeffress asked them to confine their requests only to the most essential road work needed in these counties. He pointed out that while the \$10,500,000 allotted to the State by the Federal government for new road construction and improvement may look like a lot of money to some people, with construction prices advancing daily, it will not go so very far.

"It is going to be impossible to do anything like the amount of new work that is being requested, and then only the most necessary work," Chairman Jeffress said. "The people of the State must remember that of this \$10,500,000, 25 per cent must be spent on improving or rebuilding streets in cities and approaches to these streets
