Raleigh, Dec. 27.—Every merchant in the State must make out and send in a sales tax return January 1, cover ing sales tax collections for December or for the quarter or year ending December 31, regardless of whether the total sales tax collections for either the month, quarter or year are less than or exceed \$10, it was pointed our today by Director Harry McMullan ot the Sales Tax Division of the Department of Revenue. These returns must be made out on the regular forms sent out to the merchants each month.

"Under the sales tax law, no merchant is required to make a monthly return unless his sales tax collections amount to or exceed \$10," McMullan said. "It also specifies that no quarterly return needs to be made unless the total sales tax collected for the quarter amounts to or exceeds \$10. But it also provide that once a year, on January 1, each meichant must make out a return and send in the tax collected and due either for the month of December, during the quarter ending December 31 or for the six months period ending December 31, regardless of how small the amount of tax may be."

A total of 28,400 merchants are now registered with the Sales Tax Division, and a report will hence be due from every one of these January 1. A second report must alo be sent in by all the merchants between Jan-

### MEASLES EPIDEMIC DUE THIS WINTER URGED TO HASTEN

Parents Urged To Be On Want Sign-Up Campaign Alert for Symptoms of Dreaded Malady

Daily Dispatch Burens, In the Sir Watter flote:

Raleigh, Dec. 27-This is another 'measles year" was indications that more children will have measles this winter than in the last four or five years, according to Dr. J. C. Knox, as sistant epidemiologist of the State Board of Health. This means that parents in all sections of the state should be on the alert for symptoms of this disease, now considered one of the most serious of childhood, in order to give their children the proper care if they contract it.

Up to December 1 this year, a to tal of 13,722 cases of measles had been reported to the State Board of health as compared with a total of 13,672 for the entire twelve months of 1932. In 1931 a total of 15,499 cases were reported, the largest number since the "measles year" of 1928 when 60,543 cases were reported and when 501 deaths resulted. Last year there were 102 deaths from measles and so far this year there have been 60 deaths.

"The greatest number of cases of measles occur in the ages from six to eight years," Dr. Knox said. "This is to be expected, due to the exposure incident to going to school and being crowded together, since it is by contact with other cases of measles that the disease is spread.

"The greater number of deaths from measles occur in children from one to two years old, the cause being pneumonia that is so frequent as to be almost a part of the disease, although it is considered only a complication of measles.

"Measles begins as an infection about the nose and throat, having the appearance of an ordinary cold at its beginning. The eyes become quite reddened, however, very nearly in the

Floyd especially urged completion of the program by January 8, when flue-cured auction markets reopen after the Christmas recess.

development of the disease and this should make a parent suspicious that it is not an ordinary cold. About the third day from the onset of the cold symptoms, the rash begins to appear and reaches its height about two or three days later, at which time the patient is sickest. In uncomplicated cases, about three days following this climax, the patient gets definitely better, the rash begins to disappear and in about five or six days after the beginning of the rash it disappears almost entirely and the temperature returns to normal. Measles is most contageous in the early stages before the rash appears."

The most serious complications of measles are first, pneumonia; and second, infections of the middle ear. causing glands of the neck which may have to be opened surgically for drainage, Dr. Knox said.

# IS BELOW RECEIPTS FOR YEAR, HOWEVER

Shortage Is More Than Half Billion Dollars Less Than Last Year at This Time

BALANCE OF TRADE FAVORABLE TO U.S.

Exports Exceed Imports by \$56,000,000 In November; 97 Percent of Nation's Bank Accounts To Be Protected Under New Insurance Plan

Washington, Dec. 27 (AP)--The Federal deficit today passed the billion dollar mark as President Roosevelt resumed conferences with advisors to prepare the administration's first budget to be presneted to Con-

gress next week Simultaneously the government continued the price of domestic gold at \$34.06 an ounce. It was the seventh successive time this figure had been

announced. As to foreign trade, the Department balance of \$56,000,000 for November-\$184,000,000 in goods going abroad, while \$128,000,000 worth came in.

Another development was an estimate by Walter J. Cummings, chairman on the Deposit Insurance Corporation, that the temporary guarantee fund becoming effectvie next week "will completely guarantee 97 percent of the bank accounts of the nation." Cummings termed the insurance of deposits up to \$2,500, which starts January 1, "the most constructive plan ever devised for the protection of bank deposits."

The exact amount of the deficit given in the latest announcement of the Treasury's condition dated Decem ber 22, was \$1.024,121,661. On the same date last year the deficit was \$1,593,694,753.

Ordinary expenditures were within receipts, but those classed by the administration as "emerbency" exceeded the amount of the deficit. Receipts since July 1, the begin-

ning of the fiscal year. were 1.440.-193,463, as compared with \$1,000,209, 302 for last year's corresponding period. Ordinary expenditures were \$1,-425,424.842. and emergency expenditures \$1.038,890,288.

Biggest items in the emergency classification were \$531,841,000 for the R. F. C.; \$204,301,000 for the Public Works Administration, and \$146,810,-000 for the Conservation Corps. The Civil Works Administration had taken \$53,842,000 and the Farm Adjustmest Administration \$39,579,000.

In his discussion of the bank insurance plan, Cummings said that on December 16 there were 5,950 unrestricted banks in the Federal Reserve System, all of which will be members of the insurance fund. He said 7,E49 non-member State banks had applied for membership, and 'it is expected that most of them will be
