Great Advances Are Made In Tuberculosis Conquest

By LOGAN CLENDENING, M. D.

There are two forms of tuberculosis that existing in the human being and in the cow (there are other forms, such as bird tuberculosis, but this probably has no significance for the human form of the disease).

Dr. Clendingen

It is also known that either the human or the bovine tuberculosis can cause the disease in human beings. It was long supposed that the bovine form of tuberculosis was an important factor in infecting infants through the medium of milk from a tuberculous cow. How unimportant this form of tuberculosis is at present may be seen in the figures of Blacklock, who made a study of infants and young children at Glasgow. In 107 cases of primary tuberculosis of the lungs in these children, only 3 cases were found in which cattle tuberculosis could be proved to exist.

Thirdly, it indicates that the entrance of the germ into the body through the lungs by means of the air which contains the germs, usually from another human source. It was long supposed that since childhood tuberculosis affects largely the lymphatic nodes of the neck and chest, the infection might enter the body by means of the tonsils. More exact studies have proved that air is the medium of conveyance, and that the first development is actually in lung tissue itself.

The significance of these studies and the diagnosis of childhood tuberculosis will be discussed in the article tomorrow.

EDITOR'S NOTE: Six pamphlets by Dr. Clendingen can now be obtained by sending 10 cents in coin, for each, and a self-addressed envelope stamped with a three-cent stamp, to Dr. Logan Clendingen, in care of this paper. The pamphlets are: "Indigestion and Constipation," "Reducing and Gaining," "Infant Feeding," "Instructions for the Treatment of Diabetes," "Feminine Hygiene" and "The Care of the Hair and Skin."

What do these conclusions mean? They can be explained under three headings. First, we believe today that tuberculosis almost invariably begins in childhood. It lasts during the entire life of the individual, and changes its aspects in the course of time so that the nature of the disease in childhood is entirely different from what it is in adult life. Secondly, these statements indicate that most infection comes from contact with other human beings who have the disease. It is known that

BIG SISTER

Getting Hot!

By LES FORGRAVE

STILL SOUND ASLEEP, I'LL NOT DISTURB HIM. I'LL SLIP OUT AND LOOK FOR THE SHED WHERE THE CONTRACTOR SAID HE THOUGHT TO FIND THAT WOOD.

I'M ANXIOUS TO GET AT IT, AS SOON AS THIS FELLOW GETS ON HIS WAY I CAN LOAD IT ON THE TRUCK AND START FOR HOME. H.M. SNOWED A BIT LAST NIGHT, I SEE.

NOT SO MUCH ASLEEP AS YOU THINK, OLD BIRD! YOU'RE HEADED FOR THAT CACHE OF LUMBER AND YOU THINK I'M NOT HEP.

I'LL SLIP OUT AND FOLLOW HIM. HE'LL LEAD ME RIGHT TO IT. THEN LET HIM LOOK OUT. I CAME FOR THAT WOOD AND I'M NOT GOING BACK WITHOUT IT!
