IT WOULD PREVENT PRINTING OF MONEY

Would Also Reassure Business, Stimulate Silver Buying as Well as Pay Soldiers; Opponents Say There Isn't Enough Silver In World To Pay Bonus

Washington, Dec. 19.-(AP)- A new pian designed to help pay the soldier bonus and strengthen the position of silver is to be brought before the silver bloc of the House soon after Congress convenues.

Proponents say the government could getp art, at least, of the money to pay the bonus immediately by applying the silver "seigniorage" in the Treasury. This is the "profit" the government makes by setting \$1.29 an ounce as the price of silver bought from miners, but taking half of that sum as "seignlorage."

Representative Scrugham, Democrat, Nevada, who was head of the silver bloc last session, sait today he plans to call the group together to consider the plan. Supporters say ti would have a

threefold result: Provide money for

the bonus, stimulate silver buying and counteract any fear in business and financial circles that the bonus might mean printing press money. So far, however, the Treasury 18 estimated to have realized less than \$100,000,000 all told on silver seiglor-age. In circles critical of the plan

was said there was "no tenough

from seigniorage." The bonus is estimated to call for. \$2,200,000,000 if paid in full at once. Silver men countered by suggesting he use of some of the profits on devaluation of the dollar.
