Officials in Tokyo Profess Ignorance of Any Part In Separatist Schemes; Army Element Insists That Secession Program Be Carried Out at Once

Tokyo, Nov. 22.—(AP)—War Minister Kawa-shima pressed vigorously today for cabinet acceptance of Japanese military views supporting the interrupted program for secession of the North China provinces.

Japanese political experts said the life of the government possibly depended on the issue.

A cabinet spokesman said the ministers heard both Foreign Minister Hirota and War Minister Kawashima report on North China developments, but the nature of the debate and any decisions reached were not immediately divulged.

With dispatches from China telling of nearly complete suspension of the autonomy scheme, Tokyo officials professed ignorance in the movement for separation of the five northern provinces from the central Nationalist government at Nanking.

A foreign office spokesman asked to explain the apparent postponement of a North China autonomy declaration, said that, since the Japanese government had never predicted such a proclamation for any certain date, there was no question of postponement.

"What is going on in North China is a matter of Chinese politics," he said. "We understand such complications."

Think Boy Died From Own Hand

Ashville, Nov. 22 (AP)—Police today closed their investigation into the death of 15-year-old Herbert Owen, saying his pose of a martyr in refusing to "tell the name of the boy who shot me," was only youthful fiction.

Brought to a hospital here November 3, the boy first said a boy companion shot him accidentally, but then said they struggled over a rifle after giving a girl's name on a tree.
